PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Provided technical analysis and engineering insights for market investigations and regulatory policy papers concerning cloud interoperability and switching standards.
- Developed and implemented automated testing systems and infrastructure to monitor compliance with the EU Data Act for regulated entities.
- Audited regulated entities against Data Act interoperability and cloud-switching standards, identifying compliance gaps and areas for improvement.
- Containerised applications using **Docker** for deployment to **Kubernetes** clusters, ensuring consistent and scalable environments.
- Managed and administered local open-source cloud infrastructure, similar to **OpenStack**, for testing and development purposes.
- Contributed to the setup and administration of CI/CD pipelines using **Azure DevOps** for automated application deployment and testing.
- Participated in cross-functional team meetings to gather requirements and provide technical evidence for internal and external reports on cloud compliance.

SKILLS

Cloud Platforms – Azure (AKS, Virtual WAN, Cosmos DB, Entra ID), GCP

Containerization & Orchestration – Docker, Kubernetes

Infrastructure as Code & Automation – Terraform, Scripted Automation, CI/CD (Azure DevOps)

Operating Systems & Cloud Management – Linux, OpenStack, Cloud Workloads

Compliance & Regulation – Data Act, Cloud Switching, Interoperability, Regulated Industries

Programming & Scripting – Python, Java

PROJECTS

Cloud Compliance Monitoring Platform (HCL Technologies)

- Engineered a Python-based automation framework to audit cloud configurations against predefined compliance policies, reducing manual audit time by **40%**.
- Developed data pipelines to ingest and analyze logs from various cloud services, flagging potential non-compliance events for further investigation.
- Integrated the platform with CI/CD tools to automate compliance checks during deployment cycles, ensuring adherence to standards.

Containerized Application Deployment with Kubernetes (HCL Technologies)

- Packaged enterprise Java applications into **Docker** containers and deployed them to a managed **Kubernetes** cluster, improving deployment consistency.
- Configured Kubernetes deployments, services, and ingress controllers to manage application traffic and ensure high availability for internal tooling.
- Wrote shell scripts to automate the build and deployment process, reducing manual intervention for application updates.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
