PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Validated end-to-end data pipelines for enterprise applications, ensuring data accuracy and completeness across integrated systems.
- Executed manual and automated testing strategies across complex data warehouse environments, identifying and tracking defects through resolution.
- Monitored data quality for production systems, supporting root cause analysis for data-related issues and collaborating with operations teams.
- Developed Python scripts to automate ETL processes and generate scheduled reports, improving data processing efficiency for business intelligence functions.
- Designed and executed SQL queries for data validation and ad-hoc analysis on large datasets within PostgreSQL and Oracle databases.
- Managed change control processes for system configurations and coordinated User Acceptance Testing (UAT) for cross-system integrations.
- Containerised Java Spring Boot services using Docker, deploying to AWS EC2 instances and configuring basic resource limits.

SKILLS

Data Quality & Testing – Data Pipelines, ETL Processes, Data Warehouse, Data Accuracy, Data Completeness, Data Consistency, Manual Testing, Automated Testing, Defect Management, Root Cause Analysis

Core Technologies – SQL, Python, Java, Spring Boot, AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, Git, Jenkins

Databases – PostgreSQL, MySQL, Oracle

BI & Analytics Tools – Power BI, Tableau, DAX, Power Query

Methodologies – Agile, Scrum, QA Best Practices

Cloud Platforms – AWS

PROJECTS

Enterprise Data Pipeline Validation Framework

- Developed a Python-based framework to automate the validation of data pipelines feeding into an enterprise data warehouse, checking for schema adherence and data integrity.
- Implemented SQL scripts to compare source and target datasets, identifying discrepancies and generating detailed reports on data quality issues, reducing manual validation effort by 40%.
- Integrated the framework with Jenkins for continuous integration, enabling automated testing of data pipeline changes during development sprints.

Financial Operations Dashboard Data Quality Enhancement

- Enhanced data quality monitoring for a payments operations dashboard by developing Python scripts to parse transaction logs and identify malformed or incomplete records.
- Wrote complex SQL queries to reconcile transaction data across multiple internal systems, improving the accuracy of operational reporting by approximately 15%.
- Collaborated with business analysts to define data quality thresholds and implement alerts for critical data anomalies, ensuring timely issue resolution.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
