HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **Java Spring Boot** REST APIs for inter-service communication, processing approximately **500 requests per second** during peak load.
- Developed and maintained **Hibernate** ORM mappings and queries, optimizing database interactions for enterprise applications and ensuring data integrity across multiple tables.
- Authored **JUnit** and **Mockito** test suites for Java components, achieving over **90% code coverage** for critical modules and reducing post-deployment defects.
- Contributed to the design and operation of **Kubernetes** deployments for traffic management services, managing container lifecycles and resource allocation on **AWS EKS**.
- Enhanced system performance by profiling and tuning **Java applications**, reducing average request latency by **30%** through efficient algorithm selection and memory management.
- Implemented secure service communication protocols and routing controls using **Envoy**, strengthening network security and enforcing access policies for internal services.
- Analyzed production issues using **Prometheus** metrics and **Grafana** dashboards, performing root-cause analysis and delivering reliability improvements for high-traffic systems.

SKILLS

Languages – Java, Python, SQL, C++, Go

Frameworks & Libraries – Spring Boot, Hibernate, JPA, JUnit, Mockito, pandas, NumPy, scikit-learn, Flask, FastAPI

Cloud & Containerization – AWS (EC2, S3, Lambda, CloudWatch), Kubernetes, Docker, Helm, Envoy, NGINX, HAProxy

Databases – PostgreSQL, MySQL, Oracle

Observability & CI/CD – Prometheus, Grafana, Splunk, Dynatrace, Jenkins, Git

Operating Systems – Linux

PROJECTS

Distributed Traffic Routing System (HCL Technologies)

- Engineered a **Java Spring Boot** microservice responsible for intelligent traffic routing, directing requests to available service instances based on real-time load and health checks.
- Integrated **Hibernate** with a **PostgreSQL** database to persist routing rules and service health status, ensuring data consistency for the traffic management system.
- Containerized the routing service using **Docker** and deployed it to a **Kubernetes** cluster, managing configuration updates and service discovery across distributed nodes.

Network Security Policy Enforcement Tool (HCL Technologies)

- Developed a **Python** script to automate the generation and deployment of network security policies for **Envoy** proxies, reducing manual configuration time by **60%**.
- Implemented logic to parse and validate security configurations against predefined templates, catching common errors before deployment and improving policy adherence.
- Built a simple REST API using **Flask** to allow authorized personnel to query the status of deployed policies and trigger policy updates.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
