# HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

## PROFESSIONAL EXPERIENCE — 3.5 YEARS

**Software Engineer — HCL Technologies, Chennai, India** Sep 2021 – Jan 2025

- Maintained accuracy of **Bills of Materials (BOMs)** and technical information within the enterprise resource planning (ERP) system, coordinating with cross-functional teams to ensure data integrity.
- Managed the **product database**, implementing version management and revision control using **PDM** principles to track design changes and ensure compliance.
- Coordinated customer enquiries and project workflows for new access solutions, acting as a technical link between sales, design, and production teams to support efficient product delivery.
- Assisted in the development of new access solutions using **SolidWorks**, contributing to the design process from concept through to production stages.
- Supported **DriveWorks automation projects** to enhance product configuration, standardisation, and overall design efficiency within the engineering team.
- Worked across multiple projects simultaneously, from initial concept ideation through to final production, ensuring timely delivery and adherence to technical requirements.
- Containerised core application services with **Docker** and deployed them to an **AWS EKS cluster**, configuring Helm charts for predictable rollout and resource management.

## SKILLS

**Design Tools** – SolidWorks, DriveWorks, Adobe Creative Suite, Keyshot

**Data Management** – Bills of Materials (BOMs), Product Database Management (PDM), Version Control, Revision Control

**Engineering Processes** – Product Configuration, Design Automation, Technical Information Management, ERP System Maintenance, Agile Methodologies

**Cloud & Containerization** – AWS, EKS, Docker

**Programming & Scripting** – Python, Java, SQL

**Software Development Tools** – Git, Jenkins, Jira, Confluence

## PROJECTS

### ERP Product Data Management Enhancement

- Enhanced the **ERP system** by implementing stricter data validation rules for **Bills of Materials (BOMs)**, reducing data entry errors by approximately 15%.
- Developed Python scripts to automate the import and export of product data between the ERP and a **Product Data Management (PDM)** system, saving an estimated 10 hours of manual work per week.
- Collaborated with the operations team to define and implement a new revision control workflow within the PDM, improving traceability for product updates.

### SolidWorks Design Automation Framework

- Designed and implemented a framework using **SolidWorks API** and **Python** to automate the generation of standard product configurations based on user inputs, reducing configuration time by 40% for common variants.
- Integrated the automation framework with **DriveWorks** to provide a user-friendly interface for sales and design teams, ensuring consistency and adherence to design standards.
- Created detailed technical documentation and training materials for the new automated design process, facilitating adoption across the design team.

## EDUCATION

**M.Sc. Data Analytics — National College of Ireland, Dublin** Feb 2026

**B.E. Computer Science — SNS College of Technology, Coimbatore, India** 2021

## CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
