PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed and enhanced critical **Operational Technology (OT) systems** including NMS and SCADA, ensuring high availability and performance for real-time network operations.
- Resolved complex application and integration issues within OT environments, performing root cause analysis to prevent recurrence and maintain system stability.
- Developed and maintained custom **interfaces and integrations** between OT systems and enterprise applications, facilitating seamless data exchange across diverse business platforms.
- Supported advanced **Distribution Management System (DMS) capabilities**, including Power Flow Analysis and Fault Location, Isolation and Service Restoration (FLISR), to optimise network performance.
- Executed data maintenance activities, including data quality validation and environment refreshes across OT systems, ensuring data integrity and operational readiness.
- Collaborated with **OT system vendors** to review and approve change requests, guide new functionality implementation, and coordinate issue resolution, ensuring system stability and alignment with business requirements.
- Containerised several backend Java Spring Boot services using **Docker** and deployed them to an **AWS EKS cluster**, configuring basic resource limits and monitoring.

SKILLS

OT Systems – SCADA, NMS, DMS, FLISR, DERMS

Integration & APIs – REST APIs, Custom Interfaces, Data Exchange

Cloud & Containerization – AWS, EC2, S3, Lambda, Docker, Kubernetes, EKS

Scripting & Automation – Python, Shell Scripting

Databases – SQL, PostgreSQL, MySQL, Oracle

Observability & Support – Splunk, Dynatrace, CloudWatch, Incident Response, Runbooks

Development Practices – Java, Spring Boot, Jenkins, Git, Agile, Scrum

PROJECTS

Operational Systems Integration Platform

- Designed and implemented a Python-based integration layer to connect legacy SCADA systems with a new enterprise reporting platform, processing approximately 15,000 data points per hour.
- Developed automated data validation scripts in Python to ensure the integrity and accuracy of data flowing between OT and IT systems, reducing data discrepancies by 40%.
- Authored comprehensive technical documentation and runbooks for the integration platform, facilitating knowledge transfer and supporting junior team members in system maintenance.

Real-Time Monitoring Dashboard Enhancement

- Enhanced an existing operational dashboard using Java Spring Boot, adding real-time data feeds from multiple NMS sources to improve visibility into network status.
- Integrated new alert mechanisms into the dashboard, reducing the average time to detect critical network events by 30% based on retrospective analysis.
- Refactored data retrieval logic to optimize query performance against a PostgreSQL database, cutting dashboard load times by 22%.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
