PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed engineering activities for municipal and industrial wastewater treatment plants, supporting project co-ordinators and the wider team in service and repairs.
- Assisted in the procurement of labour, parts, and materials required for projects and service level agreements, ensuring timely acquisition of necessary resources.
- Developed timeline plans for installations, from initial repairs and maintenance through contract award to final project completion and handover of documentation.
- Contributed to the management of site labour for various projects, coordinating tasks and ensuring efficient workforce deployment.
- Authored engineering reports, method statements, and risk assessments, detailing project scope, safety protocols, and operational procedures.
- Supported the creation of O&M; documentation and assisted in enforcing safe work practices onsite during all installation phases.
- Containerized and deployed Java Spring Boot applications on AWS EC2 instances using Docker, integrating with Jenkins for automated CI/CD pipelines.

SKILLS

Engineering – Mechanical Engineering, Electrical Engineering, Civil Engineering, Automation Engineering, Wastewater Treatment, Water Treatment, Pumping Stations, Project Management, Procurement, Timeline Planning, Site Labour Management, Engineering Reports, Method Statements, Risk Assessments, Commissioning Schedules, O&M; Documentation, Health & Safety, Safe Work Practices

Software & Tools – MS Office, MS Project, Jira, Confluence, Git, Jenkins, Docker, AWS (EC2, S3, Lambda, CloudWatch)

Programming Languages – Java, Spring Boot, Python, SQL

Databases – PostgreSQL, MySQL, Oracle

Monitoring & Support – Splunk, Dynatrace

Data Analytics – Power BI, Tableau, R, pandas, NumPy, scikit-learn, DAX, Power Query

PROJECTS

Water Treatment Plant Operations Dashboard

- Developed a Java Spring Boot application to monitor operational parameters for wastewater treatment plants, integrating with sensor data streams.
- Implemented REST APIs for real-time data ingestion and status updates, enabling project co-ordinators to track plant performance against SLAs.
- Designed a PostgreSQL schema to store historical operational data, facilitating the generation of engineering reports and performance analysis.

Automated Site Readiness Reporting Tool

- Created a Python script to automate the generation of site readiness reports by parsing data from various sources, including MS Excel spreadsheets.
- Developed a feature to automatically cross-reference required safety documentation against project timelines, flagging potential compliance risks.
- Built a simple Flask API to deliver compiled reports on demand, reducing manual report generation time by approximately 40% for the operations team.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
