HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Researched and prototyped **generative AI** solutions for automating documentation generation, reducing manual effort by an estimated **40%**.
- Developed **Python** scripts to ingest and process unstructured data from multiple sources for **machine learning** model training.
- Designed and implemented **AI prototypes** using **Azure AI Services** and the **Python** data stack, focusing on natural language processing tasks.
- Assessed **AI model performance** and explainability for a text classification prototype, identifying key features contributing to prediction accuracy.
- Collaborated with the **Porto AI team** to align on architectural standards and integrate reusable AI components into a shared framework.
- Contributed to the design of future **AI architecture** by evaluating emerging technologies and integration patterns for potential adoption.
- Containerized **AI prototypes** using **Docker** for consistent deployment and testing across development and staging environments.

SKILLS

AI/ML – Artificial Intelligence, Machine Learning, Generative AI, Natural Language Processing, AI R&D;, AI Strategy, AI Architecture, AI Use Cases, AI Model Performance, Explainability, Responsible AI

Cloud Platforms – Azure AI Services, Azure OpenAI, Azure Machine Learning

Programming Languages – Python

Frameworks/Libraries – scikit-learn, pandas, NumPy

DevOps/Tools – Docker, Git, Jenkins

Data Handling – Structured Data, Unstructured Data

PROJECTS

Generative AI for Automated Report Generation

- Developed a **Python** application using **LangChain** to automatically generate technical documentation from code comments and design specifications.
- Engineered a **RAG** system to retrieve relevant information from a knowledge base, improving the accuracy of generated reports by **30%**.
- Containerized the application using **Docker**, enabling seamless deployment to various environments and reducing setup time for new users.

Customer Support Ticket Classification Prototype

- Built a **machine learning** model using **scikit-learn** to classify customer support tickets by issue type, achieving **~0.85 AUC** on a dataset of 15,000 tickets.
- Developed feature extraction pipelines in **Python** to process ticket text, identifying key terms and sentiment for improved classification accuracy.
- Designed a REST API using **FastAPI** to serve the classification model, enabling real-time analysis of incoming support requests.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
