# HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

## PROFESSIONAL EXPERIENCE — 3.5 YEARS

**Software Engineer — HCL Technologies, Chennai, India** Sep 2021 – Jan 2025

- Assessed and supported severity assignment for reported vulnerabilities using CVSS scoring, facilitating clear communication to technical and non-technical stakeholders.
- Coordinated the remediation of findings from the Bug Bounty and Vulnerability Disclosure Programs, liaising directly with whitehat researchers to ensure timely resolution.
- Analyzed vulnerability findings to identify gaps in existing vulnerability scanners and worked with relevant teams to improve visibility and detection capabilities.
- Identified missing security controls that could have prevented or mitigated Bug Bounty findings and tracked their implementation to completion.
- Maintained and followed runbooks for day-to-day Bug Bounty program activities, ensuring consistent and efficient operational procedures.
- Collaborated with Risk Management teams to document identified risks and issues highlighted through the Bug Bounty Program, ensuring proper tracking and reporting.
- Containerized a Java Spring Boot application for a new asset onboarding service using Docker and deployed it to an AWS EC2 instance, enabling faster integration of new systems into the security monitoring framework.

## SKILLS

**Vulnerability Management** – CVSS, Vulnerability Disclosure Programs, Penetration Testing, Web Application Assessment, Secure Coding Practices

**Security Operations** – Intrusion Detection Systems, SIEM, Incident Response, Security Controls, Risk Management

**Cloud & Infrastructure** – AWS (EC2, S3, Lambda, CloudWatch), Linux, Docker, Kubernetes, System Administration

**Compliance & Regulations** – PCI DSS, GDPR, PII, NIST CSF, HIPAA

**Tools & Methodologies** – Jira, Confluence, ServiceNow, Git, Jenkins, Agile/Scrum

**Programming & Scripting** – Java, Spring Boot, Python, SQL

## PROJECTS

### Security Vulnerability Triage System

- Developed a Python script to parse incoming vulnerability reports and automatically assign initial severity scores based on CVSS parameters, reducing manual triage time by approximately 30%.
- Integrated the script with Jira to create tickets for each new vulnerability, including detailed descriptions, affected assets, and proposed remediation steps.
- Designed a simple API endpoint using Flask to allow researchers to submit findings directly, ensuring consistent data formatting for analysis.

### Cloud Asset Security Monitoring

- Implemented a Java Spring Boot microservice deployed on AWS Lambda to monitor new assets being added to cloud environments, identifying potential security misconfigurations.
- Configured AWS CloudWatch alarms to trigger notifications for critical security events detected by the monitoring service, alerting the security operations team within minutes.
- Wrote unit tests using JUnit to ensure the reliability and accuracy of the security checks performed by the monitoring service.

## EDUCATION

**M.Sc. Data Analytics — National College of Ireland, Dublin** Feb 2026

**B.E. Computer Science — SNS College of Technology, Coimbatore, India** 2021

## CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
