HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented a **web application** for internal operations, providing a unified view of platform jobs, health, and alerts, directly addressing the need for consolidated system monitoring.
- Developed **API endpoints** to integrate job status with engineering ticketing systems, enabling support teams to link live issues directly to actionable tasks.
- Built a **searchable and filterable job view** within the operations platform, allowing engineers to quickly locate and inspect specific quantum job executions based on various parameters.
- Authored comprehensive **system design documentation**, including architecture diagrams, data flow specifications, and API contracts, for review by senior engineering staff.
- Configured **CI/CD pipelines** using Jenkins and Git for automated testing and deployment of the internal operations platform across development and staging environments.
- Integrated live **platform health metrics** and alerts into the operations dashboard, providing real-time visibility into system performance and potential issues.
- Containerized the operations platform services using **Docker** and deployed them to an AWS EKS cluster, ensuring consistent environments and scalable operation.

SKILLS

Languages – Python, JavaScript, TypeScript, SQL, Java

Web Technologies – React, REST APIs, HTML, CSS

Databases – PostgreSQL, MySQL, Oracle

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Jenkins, Git

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn, FastAPI

Tools & Platforms – Jira, Confluence, Splunk, Dynatrace, Power BI, Tableau

PROJECTS

Internal Quantum Job Monitoring Dashboard

- Developed a **full-stack web application** using Python (FastAPI) and React to aggregate and display status for thousands of quantum jobs processed by the platform.
- Implemented **RESTful APIs** to fetch real-time job data from various backend services and integrated with a PostgreSQL database for historical job information.
- Designed and built **interactive dashboards** with live alerts for system health, enabling engineers to quickly identify and respond to job failures or platform anomalies.

Cross-System Integration Platform (HCL Technologies)

- Engineered **Java Spring Boot microservices** to facilitate data exchange between disparate enterprise systems, supporting critical financial operations workflows.
- Developed **REST APIs** for secure data transfer and implemented robust error handling and logging mechanisms, improving system reliability for a financial services client.
- Managed **database schema changes** and optimized SQL queries in PostgreSQL, reducing data retrieval times for operational reporting by approximately 18%.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
