PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **Java Spring Boot microservices** for new feature development, adhering to established architectural patterns and API contracts.
- Enhanced system reliability by implementing comprehensive **unit tests using JUnit and Mockito**, achieving over 85% code coverage for critical modules.
- Developed and maintained **Hibernate/JPA entities and data access objects** for complex relational data models, ensuring efficient and secure data persistence against a PostgreSQL backend.
- Contributed to architectural discussions for **distributed, highly available systems**, focusing on improving inter-service communication and fault tolerance.
- Participated in code reviews and technical estimation sessions, ensuring adherence to clean, maintainable coding styles and contributing to sprint planning.
- Monitored production systems using **Splunk and Dynatrace**, actively resolving P1/P2 incidents and contributing to root cause analysis to prevent recurrence.
- Containerised Java applications using **Docker** and managed deployments within a **Kubernetes** environment, integrating with CI/CD pipelines via Jenkins.

SKILLS

Languages – Java, Python, SQL, R, HTML, CSS

Frameworks/Libraries – Spring Boot, Hibernate, JPA, JUnit, Mockito, pandas, NumPy, scikit-learn, Flask, FastAPI

Databases – PostgreSQL, MySQL, Oracle

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Jenkins, Git, Bitbucket, Maven

Tools/Platforms – Jira, Confluence, Splunk, Dynatrace, Power BI, Tableau

Methodologies – Agile, Scrum, Microservices

Domain – Enterprise Systems Support, Financial Services Operations, Data Analytics

PROJECTS

Java REST API for Transaction Processing (HCL Technologies)

- Developed a **Java Spring Boot REST API** to manage inbound transaction messages, integrating with an Oracle database for persistent storage.
- Implemented **Hibernate** for efficient data mapping and retrieval, optimizing queries to handle high-volume message processing workloads.
- Containerised the API service using **Docker** and deployed it to an AWS EC2 instance, ensuring basic scalability and resilience.

Python Automation for System Monitoring (HCL Technologies)

- Automated log analysis and alert generation using **Python scripting**, parsing data from **Splunk** to identify recurring system issues.
- Developed scheduled reporting scripts with **pandas** to summarise operational metrics for the financial services dashboard team, reducing manual reporting effort by **~15 hours per week**.
- Integrated scripts into a **Jenkins CI/CD pipeline** for automated execution and deployment across development and staging environments.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
