PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Supported engineering projects by collecting and analyzing **manufacturing and engineering data**, identifying key performance indicators for process improvement initiatives.
- Assisted with project planning, tracking, and reporting by preparing and maintaining **engineering documentation and reports** for multiple concurrent projects.
- Participated in **process improvement and problem-solving initiatives**, contributing to root cause analysis and the implementation of corrective actions within a manufacturing environment.
- Collaborated with **cross-functional teams** including operations, quality, and supply chain to ensure project objectives were met within defined timelines and quality standards.
- Managed multiple project priorities and deadlines in a fast-paced manufacturing setting, adapting to changing requirements and ensuring timely delivery of tasks.
- Contributed ideas for **continuous improvement** across engineering and operational processes, focusing on enhancing efficiency and reducing waste.
- Containerized core application services using **Docker** and deployed them to **AWS EC2** instances, establishing basic CI/CD pipelines with **Jenkins** for automated testing and deployment.

SKILLS

Project Management – Project Planning, Project Tracking, Reporting, Documentation, Task Management, Deadline Management, Prioritization

Engineering & Manufacturing – Process Improvement, Problem Solving, Root Cause Analysis, Corrective Actions, Continuous Improvement, Quality Standards, Safety Standards

Data Analysis & Reporting – Data Collection, Data Analysis, Manufacturing Data, Engineering Data, Reporting, Documentation

Software & Tools – Microsoft Excel, Microsoft Office Suite, Jira, Confluence, Git

Cloud & Containerization – AWS EC2, Docker, Jenkins

PROJECTS

Manufacturing Process Optimization Initiative

- Analyzed production line data to identify bottlenecks and areas for improvement, resulting in a **15% reduction** in cycle time for a key assembly process.
- Developed standardized documentation and checklists for critical manufacturing steps, improving consistency and reducing errors by approximately **10%** for new operators.
- Collaborated with the operations team to implement and validate new process controls, ensuring adherence to quality and safety standards.

Automated Reporting Pipeline for Operational Metrics

- Engineered Python scripts to aggregate and process operational data from multiple sources, automating the generation of weekly performance reports.
- Built interactive dashboards using **Power BI** to visualize key manufacturing metrics, providing stakeholders with actionable insights into production efficiency and quality.
- Integrated the reporting pipeline with **Jira** for tracking identified issues and resolutions, enhancing visibility for the project management team.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
