HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **TypeScript** backend services and REST APIs, focusing on system scalability and maintainability for enterprise applications.
- Developed **AI-powered applications** and agentic workflows using LLMs and modern AI tooling, integrating with platforms like **OpenAI** to deliver intelligent user experiences.
- Contributed to the design and implementation of complex, cross-functional software initiatives, owning features from conception through production readiness and ongoing improvement.
- Applied **AI-assisted development workflows**, including prompt engineering and agent orchestration, to accelerate the design, development, and testing phases.
- Enhanced system reliability and observability through robust testing strategies, code refactoring, and adherence to **DORA-oriented practices**.
- Collaborated with clients and internal stakeholders to clarify requirements, establish priorities, and align technical deliverables with business outcomes.
- Containerized backend services using **Docker** and deployed them to cloud environments, ensuring efficient resource utilization and scalable operations.

SKILLS

Languages – TypeScript, Python, Java, SQL, R

AI/ML – LLMs, OpenAI, Claude, Agentic Frameworks, AI Agents, Prompt Engineering, RAG, LangChain, LlamaIndex, Vector Databases, AI Evaluation, AI Observability

Backend & APIs – Node.js, NestJS, REST APIs, gRPC, Spring Boot, FastAPI, Flask

Databases – PostgreSQL, MySQL, Oracle, Relational Databases

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Terraform, CI/CD, Jenkins

Frontend & Extensions – Chrome Extensions, React.js

Methodologies – Extreme Programming, Agile, Scrum, TDD, Code Reviews

PROJECTS

AI-Powered Customer Engagement Platform (HCL Technologies)

- Developed a **TypeScript**-based backend service to manage AI agent interactions for customer support, processing an average of **~800 requests per hour**.
- Integrated with **OpenAI** APIs to enable natural language understanding and response generation within customer-facing chat interfaces.
- Implemented a **RAG** system using vector databases to provide contextually relevant information to AI agents, improving response accuracy by **~22%**.

Intelligent Transaction Analysis System (MSc Project)

- Built a Python application to process and analyze financial transaction data, identifying patterns using **scikit-learn** models.
- Engineered a feature pipeline to extract relevant data points, including transaction velocity and merchant category, from a dataset of **~50,000 records**.
- Trained a **gradient-boosted classifier** to detect anomalous transactions, achieving an AUC of approximately **0.84**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
