PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained Java Spring Boot REST APIs for internal financial services systems, handling over **5,000 requests per hour** and supporting critical transaction processing.
- Implemented data extraction and transformation logic using **Python** and **pandas** to populate reporting databases, reducing manual data collation effort by approximately **15 hours per week**.
- Managed production incidents for enterprise applications, performing root cause analysis and implementing fixes within strict **SLA targets** across a P1/P2 incident response rotation.
- Designed and executed financial models within **Excel** to support scenario and sensitivity analyses for a portfolio of **200+ ABF transactions**, informing Investment Committee presentations.
- Maintained and updated performance data and risk metrics within internal portfolio management systems, ensuring data integrity for quarterly **portfolio reviews**.
- Collaborated with **investor relations** and risk teams to gather requirements and provide ad hoc data extracts for reporting and investor materials.
- Containerised Java microservices using **Docker** and deployed them to **AWS EC2** instances, improving deployment consistency and reducing manual setup time.

SKILLS

Languages – Java, Python, SQL, R

Frameworks/Libraries – Spring Boot, pandas, NumPy, scikit-learn

Databases – PostgreSQL, MySQL, Oracle

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Tools/Platforms – Excel, Power BI, Tableau, Splunk, Dynatrace, Jira, Confluence, Bloomberg, FactSet

Domain Expertise – Structured Finance, ABF, Portfolio Monitoring, Financial Modelling, Risk Metrics, Transaction Analysis, Data Analytics, Business Intelligence

PROJECTS

Portfolio Performance Monitoring Dashboard

- Developed interactive dashboards in **Power BI** to visualize key performance indicators and risk metrics for a portfolio of enterprise assets, enabling stakeholders to track trends at a glance.
- Engineered **Python** scripts to automate the aggregation and cleaning of financial data from disparate sources, feeding into the Power BI data model and reducing manual data preparation time by approximately **10 hours per month**.
- Applied **DAX measures** and Power Query transformations to create calculated fields and ensure data accuracy for over **50 distinct metrics** displayed across multiple report pages.

Financial Transaction Reconciliation Service

- Built a **Java Spring Boot** service to process and reconcile financial transaction messages, implementing robust error handling and logging for critical operations.
- Developed RESTful APIs to expose reconciliation status and data to downstream systems, supporting integration with existing enterprise platforms and ensuring data consistency across services.
- Managed database interactions using **JPA** and **PostgreSQL**, including schema updates and performance tuning for high-volume transaction processing, handling approximately **3,000 transactions per batch**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
