PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **CI/CD pipelines** using **Jenkins** and **Git**, automating build and deployment processes to reduce release cycle time by **30%**.
- Automated repetitive infrastructure configuration tasks using **Bash** and **Python** scripting, saving approximately **15 hours** of manual effort per month for the operations team.
- Managed and maintained production infrastructure on **AWS**, including **EC2** instances and **S3** storage, ensuring high availability and performance.
- Implemented **Docker containerization** for application deployment, enhancing consistency across development, staging, and production environments.
- Collaborated with a global team of **20+ engineers** across multiple sites to integrate new features into the LMR software portfolio, ensuring seamless inter-group teamwork.
- Developed and maintained **Groovy scripts** for **Jenkins** pipeline customization and automation, improving build efficiency and reliability.
- Supported a large-scale **Linux OS** environment, performing log analysis, shell scripting, and cron job management for scheduled tasks.

SKILLS

SCM/DevOps – Git, Bitbucket, Artifactory, Jenkins, Sonarcube, Klocwork, Gradle, Maven, JCasc, IAC

Cloud Platforms – AWS, GCP, Azure

Containerization – Docker

Scripting Languages – Bash, Perl, Python, Groovy

Programming Languages – Java, Groovy

Operating Systems – Linux

Databases – MySQL

PROJECTS

Automated Deployment Pipeline for Enterprise Applications

- Engineered an end-to-end **CI/CD pipeline** using **Jenkins**, integrating **Git** for version control and **Artifactory** for artifact management.
- Developed **Python scripts** to automate environment provisioning on **AWS**, reducing manual setup time by **40%** for new deployments.
- Containerized applications using **Docker**, ensuring consistent deployment across development and production environments.

Linux System Automation and Monitoring Framework

- Created **Bash** and **Python** scripts to automate routine system administration tasks on **Linux** servers, including log rotation and user management.
- Implemented monitoring checks and alerts using **CloudWatch**, proactively identifying and resolving potential issues before they impacted service availability.
- Managed scheduled jobs and system configurations via cron and shell scripting, improving operational efficiency for a team of 5.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
