HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** REST APIs for internal microservices, handling approximately **2,100 requests per minute** during peak load.
- Implemented robust data persistence layers using **Hibernate** and **JPA**, ensuring efficient data retrieval and integrity for enterprise applications.
- Engineered **Python** scripts to automate ETL processes for report generation, reducing manual processing time by **40%** for the operations team.
- Contributed to the design and implementation of technical studies and calculations for infrastructure projects, focusing on electrical systems integration.
- Assisted in the preparation of technical reports and drawings for substations and overhead line projects, ensuring adherence to project specifications.
- Participated in Agile ceremonies, including sprint planning and code reviews, to ensure timely delivery of project components and maintain code quality.
- Containerized Java applications using **Docker** and managed deployments to **AWS EC2** instances, improving application portability and scaling.

SKILLS

Languages – Java, Python, SQL, R

Frameworks & Libraries – Spring Boot, Hibernate, JPA, pandas, NumPy, scikit-learn

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

Tools & Platforms – Splunk, Dynatrace, Jira, Confluence, Power BI, Tableau

Methodologies – Agile, Scrum, CI/CD

Domain – Electrical Engineering, Data Analytics, Financial Services Operations

PROJECTS

Electrical Systems Design Automation (HCL Technologies)

- Developed Python scripts to automate routine calculations for electrical system designs, reducing calculation time by **35%** for a team of 5 engineers.
- Integrated script outputs with a central data repository using **SQL** (PostgreSQL) to maintain a historical log of design parameters.
- Designed and implemented a basic REST API using **Flask** to allow other engineering teams to query design parameters programmatically.

Transmission Network Data Analysis (MSc Applied Project)

- Analyzed historical transmission network load data using **Python** (pandas, NumPy) and **R** to identify patterns and potential areas for optimisation.
- Created interactive **Power BI** dashboards to visualise network performance trends and present findings to academic stakeholders.
- Applied statistical methods, including regression analysis, to model the impact of renewable energy integration on grid stability.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
