PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Inspected customer premises for signs of pests and identified potential risks, including assessing environmental factors and habitat suitability.
- Tackled pest problems by cleaning and removing evidence of pest behaviour, implementing containment strategies to prevent recurrence.
- Advised customers on the maintenance and hygiene of their premises to prevent future pest infestations, focusing on environmental control measures.
- Completed accurate reports after every visit, detailing inspection findings, treatment actions, and customer recommendations using company-specific documentation tools.
- Provided exceptional customer service and upheld a professional image at all times, building rapport and trust with clients across diverse settings.
- Managed a geographical service area, optimising routes and scheduling to efficiently address customer pest control needs within the designated region.
- Containerised Java Spring Boot microservices with Docker for consistent deployment across development and production environments on AWS EC2.

SKILLS

Pest Control – Inspection, Risk Assessment, Pest Identification, Habitat Assessment, Treatment, Customer Advice, Hygiene Maintenance

Customer Service – Client Interaction, Professional Image, Rapport Building, Problem Resolution, Reporting

Field Operations – Route Optimisation, Scheduling, Geographical Area Management, Flexibility, On-Call Availability

Technical Skills – Java, Spring Boot, Docker, AWS EC2, Linux Shell Scripting, SQL, Python

Reporting & Documentation – Accurate Reporting, Visit Completion, Technical Documentation

PROJECTS

Automated Site Inspection Reporting System

- Developed a Python application to streamline the generation of site inspection reports, reducing manual data entry time by approximately 40%.
- Implemented data validation checks to ensure accuracy and completeness of inspection findings before report finalisation.
- Designed a user-friendly interface for field technicians to input inspection data, improving usability and reducing errors.

Java-based Scheduling and Dispatch System

- Engineered a Java Spring Boot backend service to manage technician schedules and dispatch assignments based on geographical proximity and job priority.
- Integrated with a PostgreSQL database to store and retrieve customer and service visit data efficiently.
- Built REST APIs to facilitate communication between the scheduling system and mobile field applications.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
