HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** REST APIs for core backend services, handling approximately **500 requests per minute** and supporting new feature integrations.
- Implemented data persistence using **Hibernate** and **JPA**, managing complex object-relational mappings for enterprise datasets and ensuring data integrity across multiple modules.
- Designed and built a **Java EE** application for internal workflow automation, incorporating robust error handling and facilitating unit testing with **JUnit** and **Mockito**.
- Contributed to software development activities across multiple platforms and technology stacks, supporting the design and development of new products and enhancements.
- Collaborated with engineers and cross-functional stakeholders to understand customer and business needs, translating technical requirements into effective software solutions.
- Participated in product development projects that bring healthcare technologies to market, taking ownership of assigned work activities and deliverables.
- Containerized backend services using **Docker** and deployed them onto **AWS EC2** instances, managing configurations and ensuring environment consistency for development and testing.

SKILLS

Languages – Java, Python, SQL, C++

Frameworks & Libraries – Spring Boot, Hibernate, JPA, JUnit, Mockito, pandas, NumPy, scikit-learn, FastAPI

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

Tools & Methodologies – Jira, Confluence, Agile, Scrum, REST APIs

Domain – Healthcare Technology, Connected Devices, Software Development

PROJECTS

Device Fleet Management Service (HCL Technologies)

- Engineered a **Java Spring Boot** microservice to manage device registration and status updates for an enterprise IoT platform, processing over **3,000 device events daily**.
- Integrated a **PostgreSQL** database to store device metadata and operational logs, developing optimized queries for real-time status retrieval and historical data analysis.
- Implemented RESTful APIs for device configuration management and health monitoring, facilitating seamless integration with upstream monitoring systems and user-facing applications.

Automated Data Ingestion Pipeline (MSc Project)

- Developed a **Python**-based data ingestion pipeline using **pandas** and **SQLAlchemy** to process and transform structured data from multiple sources into a data warehouse schema.
- Built automated reporting functionalities that generated daily summary statistics, delivering insights on data quality and pipeline performance to project stakeholders.
- Applied data validation checks and error logging mechanisms to ensure data integrity and facilitate rapid debugging of data flow issues.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
