PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **Java Spring Boot** microservices to support core financial transaction processing, handling approximately 5,000 requests per minute.
- Developed and maintained **Hibernate and JPA** entities and queries for a complex enterprise application, ensuring data integrity across multiple relational databases.
- Authored comprehensive unit and integration tests using **JUnit and Mockito**, achieving over 85% code coverage for critical Java modules.
- Contributed to **code reviews** for a team of 5 engineers, providing constructive feedback to maintain code quality and adherence to architectural standards.
- Actively participated in **agile Scrum ceremonies** including sprint planning, daily stand-ups, and retrospectives, contributing to accurate technical estimations for new features.
- Mentored two junior engineers on best practices for **object-oriented design** and Java development, accelerating their onboarding and productivity.
- Containerized multiple **Java applications** using **Docker** and managed deployments to **AWS EC2** instances, improving deployment consistency and reducing manual intervention.

SKILLS

Languages – Java, Python, SQL, JavaScript, C#

Frameworks/Libraries – Spring Boot, Hibernate, JPA, JUnit, Mockito, scikit-learn, pandas, NumPy

Databases – PostgreSQL, MySQL, Oracle, RDBMS

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Methodologies – Agile, Scrum

Tools – Jira, Confluence, Splunk, Dynatrace

Domains – Financial Services, Portfolio Management, Trading, Compliance, Post-Trade, IBOR, Wealth Management

PROJECTS

Enterprise Java Transaction Processing System

- Developed a suite of **Java Spring Boot** microservices to manage and process financial transactions, integrating with existing enterprise systems via **REST APIs**.
- Implemented data persistence using **Hibernate and PostgreSQL**, optimizing queries to support high-throughput transaction volumes and ensure data consistency.
- Containerized the microservices with **Docker**, enabling consistent deployments on **AWS EC2** and facilitating seamless integration into the CI/CD pipeline.

Financial Operations Data Enrichment Pipeline

- Engineered a **Python**-based data pipeline using **pandas** to extract, transform, and load operational data from multiple sources, enriching transaction records for analysis.
- Developed automated reporting scripts in **Python** that generated daily summaries of processing volumes and error rates, delivered via scheduled jobs.
- Collaborated with business analysts to refine data extraction logic based on evolving reporting requirements for the financial operations dashboard.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
