PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed production support for business-critical trading systems during EMEA hours, focusing on US overnight and pre-market operations, ensuring readiness through application health and connectivity checks.
- Diagnosed and resolved incidents across application, operating-system, network, and database layers using **Splunk** logs, **Dynatrace** metrics, and system behaviour analysis to assess trading impact.
- Built and maintained **Python** automation scripts for repetitive operational tasks, reducing manual intervention by an estimated **15%** across the support team's daily workflow.
- Developed and deployed **Java Spring Boot** REST APIs for cross-service data exchange, incorporating request validation and circuit-breaker patterns to enhance system resilience.
- Participated in **code reviews** and **sprint planning** sessions, contributing technical estimations and insights to the development lifecycle for new feature releases.
- Contributed to strengthening deployment and recovery practices by implementing controlled release, verification, and rollback procedures for proprietary trading applications using **Git**.
- Containerized backend services using **Docker** and deployed them to an **AWS EC2** environment, configuring basic resource limits for predictable rollout and scaling.

SKILLS

Languages – Python, Java, SQL, Bash, PowerShell

Frameworks/Libraries – Spring Boot, pandas, NumPy, scikit-learn

Cloud/Infra – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Linux

Databases – PostgreSQL, MySQL, Oracle

Tools/Observability – Splunk, Dynatrace, Jenkins, Jira, Confluence, Git

Analytics/BI – Power BI, Tableau, DAX, Power Query, R/RStudio

PROJECTS

Automated Production Readiness Checks

- Engineered a suite of **Python** scripts to automate pre-trading readiness checks for a financial services dashboard, covering application status, database connectivity, and scheduled job execution.
- Integrated scripts with **AWS Lambda** and scheduled **cron jobs** on Linux servers, reducing manual verification time for the operations team by approximately **45 minutes** per day.
- Developed a consolidated reporting mechanism using **pandas** to summarize check results, highlighting potential issues for the support team to triage before the US trading day.

Transaction Reconciliation Workflow Automation

- Developed **Java Spring Boot** microservices to process and reconcile high-volume transaction data streams from multiple upstream systems.
- Implemented data validation and error handling logic, reducing reconciliation discrepancies by **~20%** and improving the accuracy of financial reporting.
- Designed and implemented RESTful APIs for querying reconciliation status and exceptions, facilitating integration with downstream operational dashboards.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
