HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and deployed **Java Spring Boot** microservices for core business logic, integrating with PostgreSQL databases and exposing REST APIs.
- Engineered **Python data pipelines** to automate ETL processes for operational reporting, transforming data from multiple sources into a unified format for analysis.
- Managed production support for enterprise applications using **Splunk** and **Dynatrace**, responding to P1/P2 incidents and ensuring adherence to strict SLAs.
- Designed and implemented **Java Persistence API (JPA)** entities and repositories to manage complex data relationships within enterprise systems, ensuring data integrity.
- Contributed to the design and refinement of **Agile/Scrum** sprint plans, providing technical estimations and participating in daily stand-ups and retrospectives.
- Containerized multiple **Java applications** using **Docker** for consistent deployment across development, staging, and production environments on AWS EC2.
- Automated routine system administration tasks on Linux servers using **shell scripting** and cron jobs, reducing manual intervention by approximately 40%.

SKILLS

Languages – Java, Python, SQL, R, Bash

Frameworks/Libraries – Spring Boot, JPA, Hibernate, pandas, NumPy, scikit-learn, Flask, FastAPI

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Kubernetes

Databases – PostgreSQL, MySQL, Oracle

Tools/Platforms – Splunk, Dynatrace, Jira, Confluence, Power BI, Tableau

Methodologies – Agile, Scrum, CI/CD

PROJECTS

Automated Data Ingestion and Processing for Environmental Monitoring

- Developed a **Python-based ETL pipeline** to ingest sensor data from various remote environmental monitoring stations, handling approximately 15,000 data points daily.
- Integrated the pipeline with **AWS S3** for scalable data storage and used **pandas** for data cleaning, validation, and transformation before loading into a PostgreSQL data warehouse.
- Created scheduled batch jobs using cron for automated data processing, ensuring timely availability of cleaned datasets for downstream analytical workloads.

Real-time Dashboard for Operational Analytics

- Built interactive **Power BI dashboards** to visualize key operational metrics derived from the enterprise systems, enabling stakeholders to monitor system health and performance.
- Designed and implemented **DAX measures** and complex data models within Power BI to support drill-down capabilities and ad-hoc querying for business analysts.
- Managed data refresh schedules and user access controls for published reports, supporting an average of 12 active users per week.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
