HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and developed REST APIs using **Java Spring Boot** for internal service communication, handling approximately **1,500 requests per minute** during peak load.
- Automated data extraction and transformation processes for financial reporting using **Python scripts** and **pandas**, reducing manual effort by **40%** for the operations team.
- Managed and optimized relational database queries across **PostgreSQL** and **MySQL** for an enterprise ERP system, improving report generation speeds by an average of **22%**.
- Built and maintained CI/CD pipelines using **Jenkins** and **Git** for automated testing and deployment of Java applications, increasing deployment frequency by **30%**.
- Developed and deployed containerized applications using **Docker** on **AWS EC2** instances, ensuring consistent environments from development through production.
- Collaborated with business analysts and operations teams to gather requirements for automation solutions, translating needs into technical specifications for **UiPath** workflows.
- Implemented secure integration patterns for enterprise applications, connecting disparate systems via APIs to streamline workflows and enhance data flow across Finance and HR functions.

SKILLS

Integration & Automation – MuleSoft Anypoint Platform, UiPath, API Development, Workflow Automation, RPA, AI-enabled automation, Generative AI, Agentic AI

Programming Languages – Java, Python, SQL, C#

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Azure, Docker, Kubernetes, Linux

Databases – PostgreSQL, MySQL, Oracle, SAP

Enterprise Systems – SAP, ServiceNow, Workday, Power Platform

Development Tools & Methodologies – Jenkins, Git, Jira, Confluence, Agile, Scrum, REST APIs

PROJECTS

Enterprise Application Integration Framework (HCL Technologies)

- Developed a reusable framework for integrating enterprise systems using **Java Spring Boot** and RESTful APIs, enabling connectivity between ERP modules and operational platforms.
- Implemented asynchronous communication patterns using message queues to handle large volumes of data transfer between interconnected systems, improving system resilience.
- Conducted code reviews and provided technical guidance to junior engineers on best practices for API design and integration development within the framework.

Automated Invoice Processing Workflow (HCL Technologies)

- Designed and built an automated workflow using **UiPath** to process incoming invoices, extracting key data fields like vendor name, amount, and date.
- Integrated the RPA solution with an enterprise database (**PostgreSQL**) to log processed invoices and trigger downstream financial system updates, reducing manual data entry by approximately **90%**.
- Collaborated with the Accounts Payable team to define process requirements and validate the accuracy of the automated data extraction and system updates.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
