HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and implemented **Python** scripts for automating data extraction and transformation processes, reducing manual effort by approximately **30%**.
- Designed and built **Java Spring Boot** REST APIs to facilitate data exchange between internal systems and external partners, handling an average of **2,000 requests per day**.
- Managed production support for enterprise applications using **Splunk** and **Dynatrace**, responding to P1/P2 incidents and ensuring adherence to strict SLAs.
- Supported material selection and specification for new product development, collaborating with engineering and purchasing teams to ensure suitability for target applications.
- Conducted material testing and analysis to assess performance and compliance with product specifications, documenting results in detailed technical reports.
- Investigated material failures and product defects, performing root cause analysis and contributing to corrective action plans to improve quality standards.
- Containerised Java applications using **Docker** and deployed them to **AWS EC2** instances, improving deployment consistency and reducing setup time.

SKILLS

Languages – Python, Java, SQL, R

Frameworks/Libraries – Spring Boot, pandas, NumPy, scikit-learn

Databases – PostgreSQL, MySQL, Oracle

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Tools – Splunk, Dynatrace, Jira, Confluence, Power BI, Tableau

Domain – Materials Science, Product Development, Quality Assurance, Manufacturing Processes, Sustainability Initiatives

PROJECTS

Automated Material Specification Analysis Tool

- Developed a **Python** application to parse and analyze material specification documents, extracting key properties and compliance requirements.
- Integrated **SQLAlchemy** with **PostgreSQL** to store and manage a database of material properties and supplier data, enabling efficient querying for selection processes.
- Created a reporting module that generated summary statistics on material suitability and compliance, supporting engineering decisions for new product designs.

Production Quality Dashboard for Manufacturing

- Built interactive dashboards using **Power BI** to visualize key quality metrics and material performance data from manufacturing lines.
- Designed **DAX** measures to track defect rates, material batch consistency, and supplier quality scores, providing actionable insights to the production team.
- Collaborated with quality assurance engineers to define data requirements and ensure the accuracy of reported metrics, leading to a **15% reduction** in material-related production defects.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
