PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Supported the identification, assessment, and reporting of technology, cyber, and operational resilience risks for enterprise financial systems, contributing to a **15% reduction** in critical incident response times.
- Collaborated with Technology and Information Security teams on risk and control assessments, identifying control gaps and proposing remediation strategies that improved compliance posture for **key regulatory requirements**.
- Contributed to the development and monitoring of risk governance frameworks, tracking key risk indicators and supporting the remediation of identified risk profile changes across multiple business units.
- Assisted in monitoring Western Union's approach to **DORA** and operational resilience, assessing the effective embedding of requirements across technology and business functions.
- Developed and maintained trusted working relationships with colleagues across Technology, Information Security, Operational Risk, and Compliance teams to facilitate comprehensive risk management.
- Supported the continued development of risk frameworks and reporting methodologies, contributing to enhanced clarity and actionable insights for senior management.
- Containerized Java Spring Boot microservices using **Docker** and managed deployments on **AWS EC2** instances, ensuring consistent environments for production applications.

SKILLS

Risk Management – IT Risk, Cyber Risk, Operational Resilience, Risk Assessments, Control Assessments, Risk Governance, Key Risk Indicators, Remediation Activities, DORA

Core Technologies – Java, Spring Boot, Python, SQL, PostgreSQL, MySQL, Oracle, REST APIs, AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux

Data Analysis & Reporting – Splunk, Dynatrace, Power BI, Tableau, DAX, Power Query, Data Modelling, Business Intelligence

Development & Operations – CI/CD, Jenkins, Git, Jira, Confluence, Agile/Scrum, Incident Response, Change Management

Analytical Tools – pandas, NumPy, scikit-learn, R / RStudio

Financial Systems – Payments Operations Dashboard, Transaction Monitoring, Reconciliation Workflows, Enterprise Business Systems

PROJECTS

Enterprise Financial Systems Monitoring Dashboard

- Developed and maintained a **Java Spring Boot** application providing operational visibility into transaction processing workflows for a major financial services client.
- Integrated with **Splunk** and **Dynatrace** to aggregate logs and performance metrics, enabling real-time alerting for over 3,200 failed payment messages per week.
- Implemented RESTful APIs for data retrieval, supporting ad-hoc querying and reporting for operations teams, which reduced manual data collation effort by approximately **20%**.

Automated IT Risk Assessment Framework

- Designed and implemented a **Python**-based framework to automate the collection and analysis of IT control evidence for risk assessments, streamlining the process for **8** distinct control families.
- Developed data pipelines using **pandas** to process evidence files and generate summary reports, identifying potential control gaps and improving data consistency for risk reporting.
- Contributed to the integration of this framework with existing ticketing systems, reducing the time spent on evidence gathering by **35%** for audit cycles.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
