HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **Java Spring Boot** microservices for core platform features, including robust error handling and state management across distributed components.
- Developed and maintained **Hibernate** entities and mappings for complex relational data models, ensuring data integrity and efficient querying against production databases.
- Authored **JUnit** and **Mockito** test suites for critical Java modules, achieving over 85% code coverage and improving overall application stability.
- Collaborated on technical design and execution for core components of a metrics platform, focusing on data pipelines and semantic layer extensions.
- Enforced schema contracts through **CI/CD** gates and automated data quality checks, ensuring rigorous metric governance for production code.
- Extended the **MetricsFlow** semantic layer to serve governed metrics to downstream consumers, supporting data product delivery for enterprise analytics.
- Containerized platform services using **Docker** and managed deployments on **AWS EC2** instances, integrating with **Jenkins** for automated build and deployment pipelines.

SKILLS

Languages – Python, Java, SQL, R

Frameworks & Libraries – Spring Boot, Hibernate, JPA, scikit-learn, pandas, NumPy, Flask, FastAPI

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

Data & Analytics – dbt, Apache Iceberg, MetricsFlow, Power BI, Tableau, DAX, Power Query, data modelling, data warehousing, A/B testing

Tools & Methodologies – CI/CD, Agile, Scrum, Jira, Confluence, Splunk, Dynatrace

PROJECTS

Enterprise Metrics Platform Development

- Engineered Python data pipelines to ingest agent telemetry into **Apache Iceberg** tables, supporting large-scale data processing within distributed architectures.
- Implemented schema contract enforcement using **dbt** and CI/CD integration, ensuring data quality and consistency for over 50 core business metrics.
- Extended the **MetricsFlow** semantic layer to define and serve governed metrics, providing a single source of truth for AI agent performance across the organization.

Java Backend Service for Financial Operations

- Developed **Java Spring Boot** REST APIs to support transaction monitoring and reconciliation workflows for a financial-services operations dashboard.
- Integrated with **PostgreSQL** databases to store and retrieve operational data, managing schema changes and ensuring data validation for high-volume transaction flows.
- Authored production runbooks and troubleshooting guides for the payments dashboard, reducing incident resolution time by an average of 15% for the support team.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
