PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and developed scalable software and **REST APIs** for a financial-services client's digital ecosystem, integrating with enterprise business systems.
- Contributed to solutions using **Python (FastAPI, Flask, OOP, Typing, Pydantic)** and **DevOps** practices to automate data pipelines and reporting.
- Supported deployment and operation of **containerized solutions** using cloud-native principles on **AWS**.
- Collaborated in **Agile** environments, applying Scrum ceremonies to deliver iterative outcomes and participating in code reviews.
- Assisted in implementing and maintaining **CI/CD pipelines** using **Jenkins** and Git branching strategies to facilitate continuous integration and deployment.
- Supported unit, integration, and performance tests using **PyTest** with TDD/BDD practices to ensure software quality and reliability.

SKILLS

Languages – Python, Java, SQL, R, Golang, Rust

Frameworks/Libraries – Spring Boot, FastAPI, Flask, Pydantic, pandas, NumPy, scikit-learn, LangChain, Hugging Face

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Azure, GCP, Docker, Kubernetes, ArgoCD, GitHub Actions

Databases – PostgreSQL, MySQL, Oracle, NoSQL

Tools & Methodologies – Git, Jenkins, Jira, Confluence, Splunk, Dynatrace, PyTest, TDD, BDD, Scrum, Kanban, Agile

AI/ML – AI Features, Machine Learning, Data Intelligence, OpenAI API

APIs & Integrations – REST APIs, AuthN/AuthZ, OpenID, OAuth2

PROJECTS

Automated Transaction Reconciliation System (HCL Technologies)

- Developed a Python-based system to automate reconciliation workflows for a financial-services client, processing approximately 15,000 transaction records daily.
- Engineered REST APIs using **Flask** to integrate the reconciliation engine with upstream and downstream operational dashboards, enhancing data visibility.
- Implemented robust logging and alerting mechanisms using **Splunk** to monitor system health and flag discrepancies in near real-time.

AI-Powered Anomaly Detection for Operational Alerts (HCL Technologies)

- Built a proof-of-concept using **Python** and **scikit-learn** to identify anomalous patterns in production system logs, aiming to predict P1 incidents.
- Trained a **Random Forest classifier** on historical log data (~1.2M entries) to detect unusual error rates, achieving an **F1-score of 0.78** on a held-out test set.
- Created basic data pipelines with **pandas** to extract features related to error frequency, response times, and system load for model training.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
