PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Supported the design, development, and testing of software features connecting **cloud**, **mobile**, and **IoT** components for industrial technology solutions.
- Wrote and maintained **clean, well-documented Python code** for automation scripts and data processing pipelines, enhancing operational efficiency by approximately **15%**.
- Participated in Agile ceremonies, including sprint planning and daily stand-ups, to collaborate on requirements and deliver features for interconnected systems.
- Contributed to **back-end development** by building and refactoring **Java Spring Boot REST APIs** that facilitated cross-service data exchange for enterprise applications.
- Assisted in identifying and resolving bugs and performance issues within production environments, ensuring continued service availability for enterprise customers.
- Managed code changes and deployments using **Jenkins pipelines** and **Git**, adhering to team standards and participating in peer code reviews.

SKILLS

Programming Languages – Python, Java, JavaScript, C#, C++, HTML

Web Technologies – React, Node.js, REST APIs, Spring Boot

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch), Azure

Databases – SQL, PostgreSQL, MySQL, Oracle, Relational Databases

Development Tools – Git, Jenkins, Docker, Jira, Confluence, Selenium, Xunit

Methodologies – Agile, Scrum, Test-Driven Development (TDD)

Domain Concepts – IoT, Cloud-Based Systems, Hardware-Software Integration, APIs

PROJECTS

IoT Lighting Control System Backend

- Developed **Java Spring Boot microservices** to manage device registration, status updates, and command dispatch for a fleet of **internet-connected lighting** controllers.
- Implemented **REST APIs** for communication between the backend services and a **React**-based web application, enabling remote control and monitoring.
- Integrated with **AWS services** like EC2 and S3 for hosting the application and storing device configuration data, ensuring scalable and reliable operation.

Automated Reporting for Operational Dashboards

- Created **Python scripts** to extract and transform data from PostgreSQL and Oracle databases, generating daily operational reports for business stakeholders.
- Designed and implemented **SQL queries** to aggregate transaction data and populate summary tables, reducing report generation time by **40%**.
- Scheduled report generation using cron jobs on Linux servers, ensuring timely delivery of critical business intelligence.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
