PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed, developed, and maintained critical components of a large-scale distributed system responsible for processing trillions of monthly invocations on **AWS Lambda**, ensuring high availability and fault tolerance.
- Optimized system performance and latency for critical control plane services, contributing to a **15% reduction** in average response times for provisioning requests.
- Collaborated with engineers across multiple Lambda teams to integrate new features and resolve complex distributed systems challenges, writing clean, maintainable code with comprehensive **unit and integration tests**.
- Participated in on-call rotations, responding to and resolving production incidents within strict SLAs, ensuring service reliability for millions of global customers.
- Developed and maintained **Python automation scripts** for data pipelines and scheduled reporting, improving operational efficiency for data validation and ETL processes.
- Contributed to team technical direction by actively participating in design discussions and code reviews, focusing on **reliability, scalability, and cost efficiency**.

SKILLS

Cloud Platform – AWS Lambda, AWS Control Plane, AWS EC2, AWS S3, AWS Lambda Runtimes, AWS CloudWatch

Programming Languages – Java, Python, SQL, Linux Shell Scripting

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn, Flask, FastAPI

Databases – PostgreSQL, MySQL, Oracle

DevOps & CI/CD – Jenkins, Git, Docker, Code Reviews

Observability & Monitoring – Splunk, Dynatrace

Methodologies – Agile, Scrum

PROJECTS

AWS Lambda Provisioning Service Enhancements

- Designed and implemented new APIs for AWS Lambda's control plane using **Java Spring Boot**, enabling customers to provision serverless functions with improved configuration options.
- Developed fault-tolerant asynchronous processing logic to handle a high volume of provisioning requests, ensuring that **over 98%** of requests were processed within 5 seconds.
- Wrote comprehensive unit and integration tests for all new service components, contributing to a **20% decrease** in post-deployment defects.

Python-based Serverless Function Orchestrator

- Built a Python-based orchestrator using **Flask** to automate the deployment and configuration of multiple AWS Lambda functions for a client's data processing workflow.
- Integrated the orchestrator with **AWS Lambda and S3**, enabling automated code deployment and data artifact management, reducing manual deployment time by approximately **40%**.
- Created detailed documentation and runbooks for the orchestration process, facilitating knowledge transfer to the client's operations team.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
