PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented **Python scripts** to automate daily data validation checks, reducing manual effort by approximately 3 hours per week for the operations team.
- Developed **Java Spring Boot** microservices for internal feature enhancements, focusing on creating robust **REST APIs** that handled an average of 150 requests per second.
- Managed production incidents for enterprise applications using **Splunk** and **Dynatrace**, resolving P1/P2 issues within defined SLAs and documenting root causes for future prevention.
- Contributed to the enhancement of **AWS services** like **EC2** and **S3** by developing automation scripts for operational tasks and monitoring, ensuring high availability for EU customers.
- Refactored **SQL queries** across **PostgreSQL** and **MySQL** databases to improve performance for reporting functions, cutting down data retrieval times by an average of **28%**.
- Participated in **Agile/Scrum** ceremonies, including daily stand-ups and sprint reviews, to track progress and address blockers in the development of new operational tooling.

SKILLS

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux

Programming Languages – Python, Java, SQL, R

Frameworks & Libraries – Spring Boot, Flask, FastAPI, pandas, NumPy, scikit-learn

Databases – PostgreSQL, MySQL, Oracle

Development Tools & Methodologies – Git, Jenkins, Jira, Confluence, Agile/Scrum

Monitoring & Operations – Splunk, Dynatrace, CloudWatch

PROJECTS

Automated Production Monitoring Dashboard (HCL Technologies)

- Developed a **Python Flask** application to aggregate and visualize operational metrics from **Splunk** logs and **Dynatrace** alerts, providing a unified view for incident management.
- Integrated with **AWS CloudWatch** to pull real-time EC2 and Lambda metrics, enabling proactive identification of performance degradation across critical services.
- Designed and implemented data processing pipelines using **pandas** to transform raw log data into actionable insights for a team of 8 operations engineers.

Enterprise Systems Integration Layer (HCL Technologies)

- Built a **Java Spring Boot** service layer to facilitate data exchange between disparate enterprise systems, including ERP modules and custom operational platforms.
- Implemented **REST APIs** for secure data transfer and system integration, ensuring compatibility with existing data flows across **PostgreSQL** and Oracle databases.
- Managed database schema changes and data validation procedures to ensure data integrity during cross-system integrations, supporting a critical financial-services client.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
