PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Managed production operations for enterprise Java applications on **AWS**, responding to P1/P2 incidents and ensuring SLA adherence for critical systems.
- Developed Python scripts to automate data extraction and transformation tasks, streamlining ETL processes for scheduled reporting and reducing manual effort by approximately **30%**.
- Engineered and deployed REST APIs using **Java Spring Boot** for cross-service data exchange, implementing robust error handling and request validation patterns.
- Analyzed and optimized complex SQL queries across **PostgreSQL** and **Oracle** databases, improving data retrieval performance for operational dashboards.
- Contributed to CI/CD pipelines using **Jenkins** and **Git**, performing code reviews and managing branching strategies to ensure smooth deployment cycles.
- Authored detailed runbooks and operational documentation for system support, facilitating knowledge transfer for a team of 5 engineers and improving incident resolution times by **15%**.

SKILLS

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Programming Languages – Java, Python, SQL, Linux Shell Scripting

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn

Databases – PostgreSQL, MySQL, Oracle

DevOps & CI/CD – Jenkins, Git, Docker

Monitoring & Observability – Splunk, Dynatrace, CloudWatch

Data Analytics & BI – Power BI, Tableau, DAX, Power Query

PROJECTS

Automated Cloud Operations Dashboard

- Developed a Python application to aggregate logs and metrics from various **AWS** services (EC2, S3, Lambda) into a centralized reporting system.
- Designed and implemented REST endpoints using **Flask** to serve aggregated operational data for consumption by an internal monitoring dashboard.
- Integrated with **Splunk** APIs to ingest real-time alerts, enabling proactive issue identification and reducing manual log analysis time by an estimated **40%**.

Enterprise System Integration Layer

- Built a Java Spring Boot service to act as an integration layer between an ERP system and a client-facing order management platform.
- Developed data transformation logic to map fields between disparate database schemas (**PostgreSQL** to **MySQL**), ensuring data consistency across systems.
- Managed the deployment of the integration service using **Docker** containers, facilitating consistent environments across development and production.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
