PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Architected and developed **Java Spring Boot** microservices and **RESTful APIs** for internal financial operations, handling approximately **3,500 transactions per second** during peak loads for a payments dashboard.
- Automated data ingestion and ETL processes using **Python scripting** and **SQL** across **PostgreSQL** and **MySQL**, reducing manual data preparation time by **20%** for operational reporting.
- Managed production support for enterprise-level **Java** and **.NET** applications, resolving P1/P2 incidents and ensuring SLA adherence on critical systems monitored via **Splunk** and **Dynatrace**.
- Designed and implemented end-to-end features for interconnected enterprise business systems, including **ERP** module integrations and cross-system data flows via **REST APIs**.
- Developed interactive **Power BI** dashboards and reports, utilizing **DAX** measures and **Power Query** for data transformation, presenting key operational insights to business stakeholders.
- Contributed to CI/CD pipeline enhancements using **Jenkins** and **Git**, improving code review turnaround time and streamlining deployment processes for a team of **8 engineers**.

SKILLS

Backend Development – Java, Spring Boot, Node.js, Python, Microservices, RESTful APIs, GraphQL

Databases – SQL, NoSQL, PostgreSQL, MySQL, Oracle

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch), Azure, GCP

Frontend Development – JavaScript, Vue.js

DevOps & CI/CD – Kubernetes, Docker, Jenkins, Terraform, Git

Observability & Monitoring – Dynatrace, Splunk, DataDog

Data Analytics & BI – Power BI, Tableau, DAX, Power Query, R, pandas, NumPy, scikit-learn

PROJECTS

Distributed Transaction Processing System (HCL Technologies)

- Developed a **Java Spring Boot** microservice responsible for processing and validating high-volume financial transaction messages, integrating with a **PostgreSQL** database.
- Implemented asynchronous communication patterns using message queues, achieving a p95 processing latency of **280ms** for individual transaction events.
- Authored comprehensive unit and integration tests using **JUnit**, contributing to a **15%** reduction in post-deployment defects for the service.

Operational Analytics Dashboard (HCL Technologies)

- Engineered data pipelines in **Python** to extract, transform, and load operational metrics from multiple enterprise systems into a data warehouse.
- Designed and deployed interactive **Power BI** dashboards to visualize key performance indicators, enabling operations teams to monitor system health and identify bottlenecks.
- Collaborated with business analysts to gather requirements and refine reports, resulting in a consolidated view that reduced manual report generation efforts by **30%**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
