PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Architected and built **distributed data services** on cloud platforms, processing **~5,000 events per second** during peak loads for internal business intelligence.
- Developed **Python and Java applications** for data ingestion and transformation, integrating with **PostgreSQL and AWS S3** to support analytics teams.
- Implemented robust **RESTful APIs** for data access, ensuring seamless integration between disparate enterprise systems and reducing data retrieval latency by **~20%**.
- Collaborated with engineering partners to gather requirements for **AI and data platforms**, translating business needs into technical specifications for new feature development.
- Designed and implemented data pipelines that embed **Generative AI capabilities**, making complex datasets more accessible and actionable for downstream consumers.
- Managed the full development lifecycle for data systems, adhering to **Software Engineering best practices** and conducting rigorous code reviews to maintain high quality.

SKILLS

Core Technologies – Python, Java, Scala, SQL, RESTful API development.

Data Platforms & Cloud – Distributed systems, Cloud databases (Snowflake, BigQuery), AWS (EC2, S3, Lambda, CloudWatch).

AI & Analytics – Generative AI concepts, LLMs, Prompt engineering, BI concepts, Data modelling, Data warehousing.

Development Practices – Test-driven development, CI/CD, Git, Jenkins, Docker, Agile/Scrum.

Databases – PostgreSQL, MySQL, Oracle.

PROJECTS

Scalable Data Processing Pipeline for Enterprise Analytics

- Engineered a high-throughput data pipeline using **Python and Apache Spark** on AWS EMR, processing over **1TB of raw data daily**.
- Developed data models and ETL processes in **SQL and PySpark** to transform disparate data sources into a unified, analysis-ready format for business intelligence teams.
- Designed and implemented **REST APIs** using Flask to expose curated datasets, enabling self-service analytics for over **50 internal data consumers**.

Generative AI-Enhanced Data Summarization Service

- Built a service that integrates **LLM APIs** to provide automated summaries of complex technical documents, improving information retrieval efficiency by an estimated **30%**.
- Developed prompt engineering strategies and data preprocessing steps in **Python** to optimize the accuracy and relevance of generated summaries.
- Deployed the service on **AWS Lambda** and integrated it with internal documentation platforms, supporting an initial user base of **15 engineers**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
