## PROFESSIONAL EXPERIENCE

### Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and shipped **Java Spring Boot** REST APIs for cross-service data exchange, incorporating request validation and circuit-breaker patterns to enhance system resilience.
- Engineered **Python** data pipelines on **AWS Lambda** and **S3** to power downstream ML scoring, processing approximately 3,500 events per second during peak hours and replacing a brittle batch job.
- Acted as primary technical contact during onboarding for three enterprise customers, gathering **feature pipeline** requirements directly with their data science teams and translating them into **Python** implementations.
- Designed and implemented **ReactJS** components and **NodeJS** backend services for interactive data applications, focusing on delivering critical business metrics with minimal latency.
- Trained a **scikit-learn** gradient-boosted classifier on a ~280k-row labelled transactions dataset to flag suspicious activity for an internal workflow, reaching approximately **0.86 AUC** on held-out data.
- Owned the complete development lifecycle for end-to-end applications, from initial concept through production deployment, including design, implementation, and testing on a consistent release schedule.

## SKILLS

**Frontend** – ReactJS, HTML5, CSS3, JavaScript

**Backend** – Java, Spring Boot, Python, NodeJS, REST APIs, FastAPI

**Cloud & DevOps** – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

**Data Platforms & AI** – Generative AI, Large Language Models, Prompt Engineering, ML, scikit-learn, pandas, NumPy, Data Warehousing, ETL

**Databases** – PostgreSQL, MySQL, Oracle, SQL

**Observability & Tools** – Splunk, Dynatrace, Jira, Confluence

**Analytics & BI** – Power BI, Tableau, DAX, Power Query, R, RStudio

## PROJECTS

### Customer Onboarding for ML Feature Platform

- Worked directly with two pilot customers to design and ship a guided onboarding flow for an internal ML feature store, including SDK examples and debug tooling.
- Built a **Python** CLI to validate customer feature definitions against the platform schema before submission, catching approximately **70%** of schema errors at write time.
- Documented common integration patterns and ran two follow-up workshops with customer data teams to upskill their internal engineers on the platform.

### Fraud Detection Model on Transaction Features

- Engineered a feature pipeline in **Python** and **SQL** to extract behavioural signals from a transaction log of roughly 1.1M records.
- Trained a **LightGBM** classifier on the resulting features, tuning class weights to handle a 1:140 fraud imbalance and reaching approximately **0.91 AUC** / **0.46 F1** on a held-out month.
- Packaged the model behind a **FastAPI** inference endpoint with input validation, achieving p95 latency around **180ms**.

## EDUCATION

**M.Sc. Data Analytics — National College of Ireland, Dublin**

Feb 2026

**B.E. Computer Science — SNS College of Technology, Coimbatore, India**

2021

## CERTIFICATIONS

---

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
