PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and developed scalable back-end web services in **Java Spring Boot**, contributing to core localization workflows for enterprise clients.
- Engineered automation scripts in **Python** to streamline data processing and reporting tasks, enhancing the efficiency of release engineering pipelines by approximately **15%**.
- Managed and resolved complex system and integration issues across distributed applications using **Splunk** and **Dynatrace**, maintaining service level objectives for critical services.
- Collaborated cross-functionally with product and engineering teams to integrate new software features into the localization platform, ensuring seamless delivery to **global markets**.
- Contributed to architectural discussions and long-term technical strategy for evolving the localization automation tools, focusing on **scalability** and maintainability.
- Refactored existing **SQL queries** in PostgreSQL and MySQL to improve data retrieval performance for operational dashboards, reducing query times by an average of **22%**.

SKILLS

Backend Development – Java, Spring Boot, Python, Ruby on Rails, Django, REST APIs, Web Services

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Jenkins, Git, CI/CD

Data & Analytics – SQL, PostgreSQL, MySQL, Oracle, Power BI, DAX, Power Query, Tableau, R, pandas, NumPy, scikit-learn

Machine Learning – LLMs, Generative AI, Model Training, Evaluation Metrics, NLP

Operations & Support – Splunk, Dynatrace, Linux, Shell Scripting, Incident Response, Change Management

Methodologies – Agile, Scrum

PROJECTS

Localization Workflow Automation Platform (HCL Technologies)

- Developed a series of **Python** scripts to automate the extraction and transformation of translation data from various sources, reducing manual effort by an estimated **30%**.
- Built REST APIs using **Java Spring Boot** to integrate with upstream and downstream systems, facilitating smoother data flow for the localization pipeline.
- Implemented monitoring and alerting for the automation workflows using **AWS CloudWatch** and **Splunk**, ensuring high availability for critical release engineering processes.

Internationalization Feature Integration Service (HCL Technologies)

- Designed and implemented a service in **Python** to manage and apply internationalization configurations across multiple product builds, supporting **over 12 languages**.
- Collaborated with the QA team to define and execute test plans for new internationalization features, ensuring proper rendering and functionality in target locales.
- Created comprehensive documentation and conducted knowledge transfer sessions for the operations team on the new service's deployment and maintenance procedures.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
