PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Installed, maintained, and troubleshooted advanced **semiconductor equipment** at customer sites, incorporating **complex machine components** and adhering to strict operational procedures.
- Performed scheduled and predictive maintenance on **electrical, vacuum, and mechanical systems** for high-precision equipment, contributing to continuous improvement programs.
- Applied **digital diagnostic tools** and analyzed machine data to resolve technical issues, supporting predictive maintenance approaches for equipment reliability.
- Coordinated directly with **enterprise customers** to ensure high-quality equipment performance and smooth operations, maintaining a zero-defect culture.
- Developed **Python scripts** to automate data extraction and reporting for equipment performance metrics, reducing manual effort by approximately **20%**.
- Participated in an immersive global training program covering **semiconductor equipment**, structured technical training, and cross-cultural teamwork.

SKILLS

Field Service – Semiconductor Equipment Installation, Maintenance, Troubleshooting, Preventative Maintenance, Corrective Maintenance, Customer Support, Cleanroom Environment, Hand Tools, Digital Multimeters, Electrical Schematics, Mechanical Schematics.

Data Analysis & Tools – Digital Diagnostics, Machine Data Analysis, Predictive Maintenance, AI (for diagnostics), Python, Splunk, Dynatrace, Power BI, Tableau, R, SQL.

Engineering Domains – Electrical Systems, Vacuum Systems, Mechanical Systems, Hydraulics, Pneumatics, Thermodynamics, Materials Engineering.

Software & Systems – Java, Spring Boot, REST APIs, AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, Git, Jenkins, Jira, Confluence.

Business & Operations – Change Management, UAT Coordination, SLA Management, Incident Response, Regulatory Awareness, GDPR Awareness.

PROJECTS

Automated Equipment Diagnostics and Reporting Tool (HCL Technologies)

- Developed a Python-based application to ingest and analyze diagnostic logs from enterprise systems, identifying recurring failure patterns.
- Created automated reports using **Power BI** that visualized key equipment performance indicators, enabling operations teams to proactively address potential issues.
- Integrated the tool with existing monitoring systems, reducing the time to identify root causes for system anomalies by an estimated **30%**.

Customer Site Equipment Performance Monitoring (HCL Technologies)

- Engineered data pipelines using **SQL** and Python to collect and process operational data from customer-facing financial services dashboards.
- Implemented real-time alerting mechanisms for transaction processing anomalies and system health, improving incident response times for critical workflows.
- Collaborated with business analysts to define key performance metrics and ensure accurate data representation in operational dashboards.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
