PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Engineered **Java Spring Boot** microservices to process high-volume financial transaction events, improving data ingestion rates by **30%**.
- Developed **event-driven architectures** using **Kafka** to manage asynchronous communication between distributed backend systems supporting trading operations.
- Designed and implemented **REST APIs** for seamless integration between core trading platforms and downstream analytics services.
- Optimized **SQL** queries against large-scale datasets in **PostgreSQL**, reducing report generation times for settlement workflows by approximately **22%**.
- Managed production incidents for critical enterprise applications, performing log analysis with **Splunk** and ensuring adherence to strict SLAs.
- Contributed to system reliability by implementing robust error handling and concurrency patterns in **Java** applications.

SKILLS

Languages – Java, Python, SQL, R

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn

Messaging & Event Streaming – Kafka, RabbitMQ

Databases – Oracle, PostgreSQL, MySQL

Cloud & Containerization – AWS (EC2, S3, Lambda, CloudWatch), Docker

Development Tools – Git, Jenkins, Jira, Confluence

Financial Systems Concepts – Trading Workflows, Settlement Systems, Transaction Data, Market Data

PROJECTS

Distributed Trading Data Ingestion Pipeline (HCL Technologies)

- Built a **Java Spring Boot** application to consume and process real-time market data streams from multiple sources.
- Integrated **Kafka** as a message broker to decouple data producers and consumers, handling over **5,000 events per second** during peak loads.
- Developed a robust error handling and retry mechanism for data ingestion, reducing data loss incidents by **40%**.

Real-Time Transaction Reconciliation Service (HCL Technologies)

- Developed a **Java** service to perform automated reconciliation of financial transactions by querying **PostgreSQL** and Oracle databases.
- Designed a flexible data model to accommodate various transaction types and reconciliation rules, supporting an initial scope of **15 distinct transaction types**.
- Implemented monitoring endpoints using **Spring Boot** Actuator to track service health and reconciliation progress for operational teams.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
