PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Facilitated communication between business operations and the Innovation Team, translating stakeholder needs into actionable development plans for AI-powered solutions and providing regular progress updates.
- Designed and developed an **AI-powered application** using **Claude** to automate the analysis of operational documents, reducing manual review time by approximately **30%** for the maintenance division.
- Mapped and optimized business processes using a **lean approach** and **BPMN 2.0**, identifying root causes for delays in the supply chain shared service and implementing controls that improved workflow efficiency by **18%**.
- Developed and deployed **Claude-based solutions** to address specific operational challenges, moving fluidly between business analyst and developer roles to ensure project alignment and successful integration.
- Managed project activities through feasibility, planning, execution, and closure, adhering to **lean project methodologies** and maintaining detailed records on standardized knowledge repositories.
- Built proficiency in operational systems, including **flight operations** and **MRO platforms**, developing specialised knowledge to act as a subject matter expert for assigned innovation projects.

SKILLS

AI & Machine Learning – Claude, AI-powered analysis, Generative AI, Prompt Engineering, LLM applications

Software Development – Python, Java, Spring Boot, REST APIs, SQL, PostgreSQL, Docker

Business Analysis & Process – Stakeholder Engagement, Business Improvement, Process Optimisation, BPMN 2.0, Lean Methodology, Requirements Gathering, Change Management

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Google Cloud Platform

Data Analysis & BI – Power BI, Tableau, DAX, Power Query, Data Modelling, Statistical Analysis, R

DevOps & Tools – Git, Jenkins, Jira, Confluence, Splunk, Dynatrace

PROJECTS

AI-Driven Document Analysis for Maintenance Operations

- Developed a **Claude-powered Python application** to ingest and synthesize technical manuals and maintenance logs, enabling faster retrieval of critical information for the MRO team.
- Designed a conversational interface allowing maintenance engineers to query the system with natural language questions, reducing average information lookup time by an estimated **40%**.
- Integrated the solution with existing ticketing systems, ensuring seamless workflow and providing an audit trail for all analyzed documents and generated insights.

Supply Chain Data Flow Optimization

- Mapped existing data flows across the supply chain shared service using **BPMN 2.0** and identified bottlenecks contributing to a **25%** delay in reporting cycles.
- Engineered **Python scripts** to automate data extraction and transformation from disparate sources (PostgreSQL, Oracle), consolidating information into a unified format for analysis.
- Implemented new data validation checks and automated reporting using **Power BI**, providing stakeholders with near real-time visibility and improving data accuracy for decision-making.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
