PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Monitored a **data center network infrastructure** ticket queue, taking action on alerts and issues within defined **Service Level Agreements**, and performing fault isolation.
- Diagnosed and troubleshot **Layer 1-3 network issues** across routing and switching devices, coordinating with internal teams and equipment manufacturers to restore service.
- Developed **Python scripts** to automate data extraction for operational reporting and scheduled tasks, improving data availability for analysis by approximately **30%**.
- Managed and escalated critical network events, ensuring clear and concise communication with stakeholders and maintaining accurate logs of troubleshooting steps in **ticketing systems**.
- Contributed to the creation of **monitors and alerts** within a network monitoring tool to drive efficiency improvements in incident detection.
- Followed documented **Methods of Procedure (MOPs) and Standard Operating Procedures (SOPs)** to ensure continuous operational improvements and maintain high availability of critical network infrastructure.

SKILLS

Networking – IP addressing, VLANs, routing, switching, CLI, Layer 1-3 troubleshooting, physical network components

Tools & Platforms – SolarWinds, Nagios, PRTG, ServiceNow, Jira, Splunk, Dynatrace, AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux

Programming & Scripting – Python, Java, Spring Boot, SQL, Bash scripting

Operations & Support – Network Monitoring, Incident Response, Ticket Management, SLA Management, Change Management, Production Support

Data Analysis & BI – Power BI, Tableau, DAX, Power Query, Data Modelling

Databases – PostgreSQL, MySQL, Oracle

PROJECTS

Network Monitoring and Alerting System Enhancement

- Engineered enhancements to an existing **network monitoring system**, developing new alerts and dashboards to proactively identify potential failures in a data center environment.
- Wrote **Python scripts** to parse log data from network devices, reducing manual analysis time for incident triage by an estimated **25%**.
- Collaborated with operations teams to refine alert thresholds and documentation, ensuring faster acknowledgment and resolution of critical network events.

Automated Production Support Dashboard

- Developed a **Python-based ETL process** to aggregate operational metrics from multiple sources, including network device logs and ticketing system data.
- Created interactive **Power BI dashboards** to visualize key performance indicators for network stability and incident response times, supporting an 8-person operations team.
- Implemented data validation checks within the ETL pipeline to ensure accuracy of reported metrics, reducing data discrepancies by approximately **15%**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
