PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Managed reconciliation and execution of **corporate action elections** within strict timelines for a financial services client, ensuring accurate booking of entitlements across multiple business units.
- Investigated and resolved complex queries from key stakeholders, including Inventory Management Desk and Prime Brokerage teams, maintaining clear communication channels and detailed audit trails.
- Executed post-payment reconciliations of stock and cash accounts, identifying and recovering funds claimed by the bank from external counterparties, reducing outstanding balances by approximately **€850K**.
- Collaborated with cross-functional operational teams to resolve escalated issues, minimizing disruption to transaction flows and ensuring adherence to defined risk thresholds.
- Developed **Python scripts** to automate data validation and reconciliation reporting, reducing manual processing time for daily reports by an estimated **3 hours**.
- Supported the integration and UAT coordination for system configuration updates within enterprise business systems, ensuring smooth post-go-live transitions across interconnected platforms.

SKILLS

Financial Services – Corporate Actions, Banking Operations, Reconciliation, Client Servicing, Risk Management, Stakeholder Management.

Programming Languages – Python, SQL, Java.

Databases – PostgreSQL, MySQL, Oracle.

Tools & Platforms – Jira, Confluence, Splunk, Dynatrace, Jenkins, AWS, Docker.

Data Analysis & BI – Power BI, Tableau, DAX, Power Query, Data Modelling.

Methodologies – Agile, Scrum, Change Management.

PROJECTS

Automated Transaction Reconciliation System (HCL Technologies)

- Engineered a **Python-based automation suite** to process and reconcile high-volume transaction data from disparate sources, handling an average of **15,000 records daily**.
- Developed **interactive Power BI dashboards** to visualize reconciliation discrepancies and track resolution progress for operational teams, enabling faster identification of exceptions.
- Integrated the automation suite with existing **PostgreSQL databases** for data staging and reporting, establishing efficient ETL processes via SQL queries and Power Query transformations.

Client Service Enhancement for Financial Reporting (MSc Project)

- Designed and implemented a **Power BI reporting solution** for a simulated financial services client, consolidating data from multiple sources into a unified dashboard.
- Created complex **DAX measures** to calculate key performance indicators related to transaction processing times and client query resolution rates, presenting findings to academic stakeholders.
- Documented the data model and ETL processes using **Power Query**, ensuring clarity and reproducibility for future analytical tasks.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
