PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Performed **AWS and Azure cloud event monitoring**, triaging over **300 security alerts** weekly and escalating critical cases to appropriate control partners.
- Tuned existing **Splunk alerts** for cloud environments, reducing false positive rates by approximately **15%** and improving detection accuracy for suspicious activity.
- Analyzed and reported critical **cloud vulnerabilities** identified across **AWS and Azure** platforms, collaborating with incident response teams to prioritize remediation efforts.
- Assessed and articulated current threats against cloud environments, including monitoring for suspicious **AI utilization** and potential jailbreak attempts.
- Updated and maintained comprehensive documentation for **cloud security tooling** and environmental changes, ensuring accurate operational runbooks for a team of 8 analysts.
- Gained hands-on experience with **Log Analytics** for viewing and correlating cloud logs, supporting investigations into security incidents and operational anomalies.

SKILLS

Cloud Security – AWS Cloud Security Hub, Azure Security Center, GCP Security, AI utilization monitoring, Threat analysis

Security Operations – Incident Response, Splunk, Log Analytics, Vulnerability Management, Threat Intelligence, HUNT

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch), Azure, GCP

DevOps & Automation – Terraform, Ansible, Docker, Jenkins, Git

Frameworks & Standards – CIS, NIST, MITRE, ITIL, GDPR, ISO 27001

Programming & Scripting – Python, Java, SQL, Bash

Enterprise Systems – Jira, Confluence

PROJECTS

Cloud Security Monitoring Enhancement (HCL Technologies)

- Developed Python scripts to automate the ingestion and correlation of **AWS and Azure logs** into Splunk for enhanced security monitoring, processing approximately **5,000 events per hour**.
- Implemented alert tuning strategies within Splunk, successfully reducing noise from common cloud operations by **18%** and focusing analyst attention on high-fidelity threats.
- Created detailed runbooks for triaging and escalating common cloud security alerts, standardizing response procedures for a team of 6 engineers.

Vulnerability Management Automation (HCL Technologies)

- Engineered automated workflows using **Ansible and Python** to query cloud environments for common misconfigurations and vulnerabilities across **50+ AWS EC2 instances**.
- Integrated vulnerability scan results with Jira, automatically creating tickets for critical findings and assigning them to relevant teams, reducing manual ticket creation time by **40%**.
- Contributed to the refinement of security policies based on findings from vulnerability assessments, aligning with **CIS benchmarks** for cloud infrastructure.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
