PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented **AI-powered product experiences** by integrating machine learning models to transform user interactions for millions of customers, driving solutions from initial concept to production.
- Amplified development velocity by embedding **AI tools** into the entire workflow—design, implementation, testing, and documentation—maintaining high standards for correctness and reliability.
- Developed and maintained **end-to-end software systems**, ranging from monoliths to microservices, applying a thoughtful selection of technologies like **gRPC** and **REST** to solve complex challenges.
- Engineered scalable and maintainable **Python applications** and **Rust services**, focusing on simplifying architectures and pipelines to enhance system efficiency and ease of maintenance.
- Contributed to the creation of impactful software, taking ownership from idea to production for systems used by millions, and continuously evolving them for scale.
- Participated in rigorous technical problem-solving, employing first-principles reasoning and structuring ideas sharply to address complex challenges and identify critical details.

SKILLS

AI/ML – AI product experiences, Machine Learning, AI tools, Model implementation, Model evaluation, AI integration

Programming Languages – Python, Rust, Java

Backend Technologies – gRPC, REST, Microservices, Monoliths, Spring Boot

Cloud & Containerization – AWS, Kubernetes, Docker

Data & Analytics – SQL, Data pipelines, ETL, Data warehousing, Power BI, Tableau, R, pandas, NumPy

Development Practices – CI/CD, Jenkins, Git, Code reviews, Agile, Scrum, Testing, Documentation

PROJECTS

Customer-Facing AI Feature Development

- Engineered and deployed an **AI-driven feature** for an enterprise customer's mobile application, focusing on personalized user recommendations that increased engagement by **18%**.
- Collaborated with customer product and engineering teams to gather requirements for the AI feature, translating business needs into technical specifications for model development and integration.
- Built reusable **Python components** for feature extraction and model serving, ensuring seamless integration into the customer's existing technology stack on **AWS**.

Internal Development Workflow Automation

- Developed an automated testing framework using **Python** and **pytest** that integrated with **Jenkins** CI/CD pipelines, reducing manual testing effort by **30%**.
- Implemented **Docker containers** to standardize development and testing environments, ensuring reproducibility across developer machines and the staging environment.
- Created a **REST API** using **Flask** to expose key metrics and logs from the automated testing suite, enabling faster debugging and performance analysis for the engineering team.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
