PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed AI-assisted Python services for content classification and tagging, integrating with the existing **DITA XML** authoring workflow to automate repetitive documentation tasks.
- Designed and implemented data transformations and pipelines to make **DITA XML** content AI-ready, ensuring it can be reliably chunked, indexed, and reasoned over by LLM systems.
- Built and extended **APIs** that power AI-driven documentation experiences, such as search and Q&A; assistants, integrating seamlessly with the existing content pipeline.
- Engineered **Python** scripts to automate operational reporting and data validation across enterprise systems, reducing manual effort by approximately **30%**.
- Collaborated with technical writers and platform engineers to identify high-value automation use cases for AI in documentation creation and maintenance.
- Managed production support for enterprise Java/.NET applications using **Splunk** and **Dynatrace**, responding to P1/P2 incidents to maintain service level agreements.

SKILLS

AI/ML & LLMs – LLMs, RAG pipelines, AI-assisted workflows, classification, tagging, summarization

Languages – Python, Java, TypeScript, JavaScript, SQL, R

Documentation & Content – DITA XML, structured content, content pipelines, metadata models, OxygenXML, OpenDITA

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Azure DevOps pipelines, Git, Jenkins

Databases & Data Handling – PostgreSQL, MySQL, Oracle, Power Query, DAX, data modelling

Development & APIs – Spring Boot, REST APIs, microservices, Git-based workflows

PROJECTS

AI Content Enrichment Pipeline (HCL Technologies)

- Developed a **Python**-based pipeline to automatically enrich **DITA XML** documentation with semantic metadata and tags, improving content discoverability for downstream AI consumption.
- Integrated the pipeline with **Git** and **Jenkins**, enabling automated processing of documentation changes and ensuring content quality checks before publishing.
- Designed and implemented transformations to structure content for efficient chunking and indexing by LLM-based search and Q&A; systems, processing approximately 1,500 documents weekly.

Automated Documentation Quality Checker (HCL Technologies)

- Built a **Python** utility to perform automated link validation, structure checks, and content quality assessments on technical documentation, catching over **80%** of common errors.
- Integrated this checker into the CI/CD workflow via **Azure DevOps pipelines**, providing immediate feedback to writers and reducing manual review cycles by an estimated **40%**.
- Created clear reporting mechanisms for identified issues, aiding technical writers in improving content consistency and adherence to documentation standards.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
