PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed **Python** services to automate content classification and tagging, integrating into existing **Azure DevOps pipelines** to support documentation quality checks.
- Engineered data transformation pipelines to convert **DITA XML** content into a format optimized for **AI chunking and indexing**, working with architects to define 'AI-ready documentation' standards.
- Built and extended **APIs** to power **AI-driven documentation experiences**, such as Q&A; assistants and enhanced search capabilities within the content pipeline.
- Collaborated with documentation leadership and platform engineers to identify and implement high-value **AI automation use cases** for content creation and maintenance.
- Designed and implemented **Java Spring Boot** REST APIs for cross-service data exchange, incorporating request validation and circuit-breaker patterns to ensure reliability.
- Managed production environments for enterprise applications, responding to P1/P2 incidents and ensuring adherence to strict SLAs and audit trails.

SKILLS

AI/ML/LLMs – LLMs, RAG pipelines, AI-assisted workflows, AI automation, content classification, content tagging, content quality checks, AI-driven documentation experiences

Programming Languages – Python, Java, Spring Boot, TypeScript/JavaScript

Data & Content Engineering – DITA XML, structured content, data pipelines, content pipelines, Git, Azure DevOps pipelines, APIs, microservices, ETL

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, CI/CD

Databases – PostgreSQL, MySQL, Oracle, SQL

Observability & Support – Splunk, Dynatrace, Linux, shell scripting, incident response, SLA management

PROJECTS

AI-Assisted Documentation Tooling (HCL Technologies)

- Developed a **Python** service that automatically classifies and tags incoming technical documentation, reducing manual effort by an estimated **30%** for the content team.
- Integrated the classification service into the existing **CI/CD pipeline** using **Jenkins**, enabling automated content quality checks before publication.
- Designed and implemented an API endpoint using **Flask** for programmatic access to the tagging service, facilitating integration with other documentation tools.

Structured Content Transformation for AI Consumption (HCL Technologies)

- Engineered a data pipeline to transform proprietary **XML** documentation into a structured format compatible with **LLM ingestion**, improving data readiness for AI models.
- Implemented schema validation using **Python** to ensure the transformed content adhered to predefined structural requirements, catching approximately **75%** of schema deviations early.
- Created sample **DITA XML** content exemplars to demonstrate best practices for structuring documentation for AI consumption, used in internal training sessions.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
