PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Facilitated requirement gathering workshops with business stakeholders to define use cases and success metrics for new AI features, translating input into actionable user stories.
- Supported the development lifecycle by acting as a bridge between technical teams and business stakeholders, ensuring clear communication of functional specifications for software projects.
- Analyzed complex data sets related to operational workflows, presenting findings to non-technical audiences to identify opportunities for AI-driven efficiency and software optimization.
- Mapped current-state processes and conducted gap analysis to pinpoint areas for improvement, contributing to the design of enhanced system integrations.
- Assisted in the integration of AI features by defining data requirements and success metrics for machine learning models, ensuring alignment with business objectives.
- Managed project documentation and backlogs within an **Agile/Scrum** framework, coordinating with development teams and business analysts for UAT support.

SKILLS

Business Analysis – Requirements Elicitation, User Stories, Functional Specifications, Gap Analysis, Process Mapping, UAT, Backlog Management, Stakeholder Interviews, Workshop Facilitation

AI/ML Concepts – AI Features, Data Science Projects, Machine Learning Models, Automated Workflows, Use Case Definition, Success Metrics

Agile Methodologies – Agile, Scrum, Sprint Planning, Retrospectives, Jira, Confluence

Data Handling – Data Interpretation, Data Analysis, SQL, Relational Databases

Software Development Lifecycle – Development Lifecycle Support, Integration, Software Optimization

Cloud & Scripting – AWS, Python, Shell Scripting

Observability & Monitoring – Splunk, Dynatrace, CloudWatch

PROJECTS

AI Feature Integration for Operational Dashboards

- Defined data requirements and success metrics for integrating an **AI-driven** anomaly detection model into a financial services operations dashboard.
- Collaborated with business analysts and operations teams to map transaction monitoring workflows and identify areas where AI could automate alert triage, reducing manual review by approximately **30%**.
- Facilitated UAT sessions for the new AI features, gathering feedback from end-users to ensure the system met business intent and improved operational efficiency.

Process Optimization and Documentation for Enterprise Systems

- Mapped and documented existing ERP system integration workflows, identifying bottlenecks and proposing streamlined data flow solutions using **REST APIs**.
- Developed **Python** scripts to automate data validation checks between interconnected enterprise systems, reducing data reconciliation errors by an estimated **18%**.
- Managed change control documentation and UAT coordination for system configuration updates, ensuring smooth post-go-live support for cross-system integrations.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
