## PROFESSIONAL EXPERIENCE

### Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Provided first-line technical support for on-bus systems, acting as the primary contact for depot staff reporting issues with ticket machines, location tracking, and communication devices.
- Carried out basic troubleshooting steps including restarting devices, updating settings, and reviewing equipment status logs to resolve onboard system issues, minimizing service delays.
- Managed the logging of all reported equipment issues within **ServiceNow**, accurately escalating complex problems to central support teams and suppliers for timely resolution.
- Performed routine health checks and functional tests on **ticket machines**, replacing faulty components like SIM cards and ensuring successful data uploads of revenue information daily.
- Tested and deployed new **software updates** on onboard devices, conducting resets as required to maintain system integrity and performance across the fleet.
- Maintained detailed records of all onboard equipment, including faulty items, replacements, and current locations, utilizing dedicated apps and **ServiceNow** for accurate tracking.

## SKILLS

**Technical Support** – First Line Support, Troubleshooting, Escalation, Technical Documentation, Runbooks, Service Desk

**Onboard Systems** – Ticket Machines, Location Tracking, CCTV, WiFi, Communication Devices, AVL Systems

**Software & Tools** – ServiceNow, Jira, Confluence, Splunk, Dynatrace, Linux Shell Scripting

**Hardware & Devices** – Device Diagnostics, Equipment Audits, SIM Card Replacement, Plug-in Equipment Management

**Operations & Logistics** – Fleet Operations, Depot Support, Spare Stock Management, Equipment Performance Monitoring, Daily Run Out Support

**Databases & Scripting** – SQL, Python Scripting, Data Validation

**Cloud & Infrastructure** – AWS EC2, AWS S3, Docker Basics

## PROJECTS

### Onboard Systems Diagnostic and Triage Tool

- Developed a **Python**-based diagnostic tool to automate initial checks on common onboard systems, reducing manual troubleshooting time by approximately **20%**.
- Integrated the tool with a mock **ServiceNow** API to simulate ticket creation and status updates, streamlining the escalation process for complex issues.
- Documented the tool's usage and troubleshooting flows in **Confluence**, creating a quick reference guide for depot staff to improve first-contact resolution rates.

### Fleet Equipment Performance Dashboard

- Created a dashboard using **Power BI** to visualize the performance and issue trends across the bus fleet's onboard equipment, based on historical incident data.
- Designed DAX measures to track key metrics such as 'Percentage of Buses Fully Operational' and 'Mean Time to Resolve' for ticket machine failures.
- Analyzed data patterns to identify recurring hardware faults, providing insights that informed proactive maintenance scheduling and spare parts replenishment strategies.

## EDUCATION

### M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

### B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

## CERTIFICATIONS

---

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
