PROJECTS

Fleet Dispatch Optimization System (HCL Technologies)

- Developed a Python-based system to manage and track customer orders for a fleet of vehicles, improving efficiency in dispatch operations.
- Implemented automated docket issuance and sales invoice generation, reducing manual processing time by approximately 30% for the operations team.
- Integrated with a basic customer database to retrieve contact information and order history, ensuring accurate and personalized customer interactions.

Customer Payment Reconciliation Dashboard (HCL Technologies)

- Built a **Power BI dashboard** to monitor customer payments and reconcile outstanding balances, providing clear visibility to the finance department.
- Designed data models and DAX measures to analyze payment trends and identify accounts requiring follow-up, supporting proactive collections.
- Automated data extraction and transformation using **Power Query** from multiple sources, ensuring timely updates for the reporting dashboard.
