PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented **Python** feature pipelines on **AWS Lambda** and **S3** to support downstream ML scoring, processing approximately 3,500 events per second during peak hours.
- Acted as the primary technical point of contact for three enterprise customers during their onboarding phase, gathering feature pipeline requirements directly with their data science teams and translating them into **Python** implementations.
- Developed and deployed a **gradient-boosted classifier** (using **scikit-learn**) on a ~280,000-row labelled transactions dataset to identify suspicious activity, achieving an **AUC of ~0.86** on held-out data.
- Engineered and shipped **Java Spring Boot** REST APIs for cross-service data exchange between the feature store and consumer applications, incorporating request validation and circuit-breaker patterns.
- Collaborated with sales teams to deliver post-sales technical demonstrations and walkthrough sessions for two customer engineering teams adopting the ML platform, assisting with integration issues in their production environments.
- Authored production runbooks and internal documentation that reduced the average customer onboarding time from over 4 weeks to approximately 10 days.

SKILLS

Languages – Python, Java, SQL, R

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Linux

Frameworks & Libraries – Spring Boot, scikit-learn, pandas, NumPy, Flask, FastAPI

Databases – PostgreSQL, MySQL, Oracle

ML/Data Platforms – MLOps, Feature Pipelines, ML Infrastructure, Data Warehousing

Tools & Methodologies – Jenkins, Git, Jira, Confluence, Agile, Scrum, CI/CD

PROJECTS

Customer Onboarding for ML Feature Store

- Partnered with two pilot enterprise customers to design and deliver a guided onboarding process for an internal ML feature store, including SDK examples and debug tooling.
- Developed a **Python** CLI to validate customer feature definitions against the platform schema, catching approximately 70% of schema errors at write time.
- Facilitated two technical workshops with customer data teams to upskill their engineers on platform integration patterns, significantly improving their self-sufficiency.

Fraud Detection Model on Transaction Data

- Engineered a feature pipeline using **Python** and **SQL** to extract behavioral signals from a transaction log of approximately 1.1 million records.
- Trained a **LightGBM classifier** on the extracted features, tuning class weights to address a 1:140 fraud imbalance and reaching **0.91 AUC** and **0.46 F1**.
- Deployed the model as a **FastAPI** inference endpoint, achieving a p95 latency of 180ms and implementing basic feature-drift logging.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
