PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Configured and tested core EHR application modules following vendor training, ensuring alignment with clinical workflows for a new hospital opening.
- Supported system go-live activities for a large-scale digital transformation project, assisting end-users and triaging critical issues in a production healthcare environment.
- Developed Python scripts to automate data migration tasks and validate data integrity between legacy and new EHR systems, reducing manual effort by approximately 40%.
- Analyzed and documented clinical processes for paediatric hospital services, translating requirements into functional specifications for EHR system configuration.
- Managed change control processes for system updates and configuration changes, coordinating User Acceptance Testing (UAT) with clinical stakeholders.
- Collaborated with cross-functional teams, including clinical staff and business analysts, to gather requirements and support readiness activities for the EHR implementation.

SKILLS

EHR Systems – Electronic Health Record (EHR), Epic (end-user/analyst experience), Digital Health Transformation

Healthcare Domain – Acute Hospital Settings, Paediatric Hospital Services, Clinical Applications, Healthcare Operations

Core Skills – Application Analysis, System Configuration, Testing, Training Development, Change Management, Requirements Gathering

Technical Tools – Microsoft Office Suite, Python, SQL, Jira, Confluence, Splunk, Dynatrace

Data Analysis & BI – Power BI, DAX, Data Modelling, Power Query, Tableau, R, pandas, NumPy

Development & Operations – Java Spring Boot, REST APIs, AWS, Docker, Linux, Jenkins, Git

PROJECTS

EHR System Configuration & Workflow Analysis (HCL Technologies)

- Configured and tested specific EHR modules including patient registration and appointment scheduling, mapping existing processes to system functionalities.
- Developed detailed documentation and training materials for clinical end-users on new EHR system features and operational procedures.
- Supported UAT cycles by triaging reported defects and coordinating resolutions with the client's operations and IT teams.

Data Migration and Validation Scripting (HCL Technologies)

- Engineered Python scripts to extract, transform, and load patient demographic and historical data from legacy systems into the new EHR database.
- Implemented data validation checks using SQL queries against PostgreSQL and Oracle databases to ensure accuracy and completeness of migrated records, identifying and correcting ~15% of initial data discrepancies.
- Automated daily data reconciliation reports using Python and scheduled execution via cron jobs on Linux servers.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
