PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Reviewed and assessed data for accuracy against client policies, ensuring adherence to established moderation guidelines for a global technology firm.
- Engaged with business stakeholders via outbound phone calls to verify information and update client platforms, improving data integrity by approximately 15%.
- Developed Python scripts to automate data validation and reporting tasks, reducing manual effort for the content review team by an estimated 20%.
- Collaborated with cross-functional teams, including operations and business analysts, to gather requirements for content moderation workflows and UAT support.
- Managed production support for enterprise applications, responding to P1/P2 incidents and performing root cause analysis to maintain operational stability.
- Contributed to the development of Java Spring Boot REST APIs for inter-service communication, implementing features for data exchange between internal systems.

SKILLS

Data Moderation & Review – Content Review, Data Accuracy, Client Policies, Compliance, Verification, Outbound Calls

Programming & Scripting – Python, Java, Spring Boot, REST APIs, SQL

Data Analysis & Visualization – Power BI, Tableau, DAX, Power Query, Data Modelling

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Operating Systems & Tools – Linux, Splunk, Dynatrace, Jira, Confluence

PROJECTS

Customer Information Verification System

- Developed a Python application to streamline the process of verifying customer information against multiple data sources, reducing verification time by 25%.
- Built automated data ingestion pipelines using SQL and Pandas to process and prepare data for the verification system, handling approximately 5,000 records daily.
- Designed a basic dashboard in Power BI to visualize verification status and identify common data discrepancies for review by operations teams.

Automated Reporting & Alerting for Operations

- Created automated Python scripts to extract, transform, and load data from operational databases into a reporting warehouse, automating daily reconciliation tasks.
- Implemented scheduled reporting jobs using cron and shell scripting on Linux to generate weekly performance summaries for management.
- Configured alerts in Splunk based on predefined thresholds to notify operations teams of critical issues in the production environment.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
