PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Supported and enhanced multiple **Java** and **.NET** software systems on a customer site, ensuring high availability and data integrity for critical production environments.
- Led day-to-day team activities, resolving system issues, data discrepancies, and managing customer Incidents & Change Requests within an Agile framework.
- Collaborated with scientists and engineers to gather requirements and implement system improvements for manufacturing execution systems (MES) and manufacturing operations management (MOM) solutions.
- Produced comprehensive documentation for system design, security, testing, and change protocols, ensuring compliance with pharmaceutical regulations like **GMP** and **CSV**.
- Monitored system performance using tools like **Splunk** and **Dynatrace**, implementing proactive measures that prevented downtime and maintained data accuracy.
- Troubleshoot and performed root cause analysis for software-related issues in manufacturing environments, supporting ongoing compliance activities such as audit trail reviews.

SKILLS

Programming Languages – Python, Java, SQL, R

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux

Development Tools & Practices – Git, Jenkins, Jira, Confluence, Agile/Scrum, CI/CD

Databases – PostgreSQL, MySQL, Oracle

Analytics & BI – Power BI, Tableau, DAX, Power Query, Pandas, NumPy, Scikit-learn

Domain Specific – GMP, CSV, Data Integrity, Manufacturing and Supply Chain, Pharmaceutical Regulations

PROJECTS

Manufacturing Data Analytics Platform

- Developed a **Python**-based data pipeline to ingest and process manufacturing data from disparate sources, transforming raw logs into structured datasets for analysis.
- Built interactive **Power BI** dashboards to visualize key performance indicators (KPIs) related to production yield, equipment uptime, and quality control, presenting findings to operations teams.
- Implemented data validation checks and logging mechanisms to ensure data integrity and compliance with **GMP** and **Data Integrity** requirements for the analytical datasets.

Automated Compliance Reporting System

- Engineered a **Java Spring Boot** application to automate the generation of periodic compliance reports, reducing manual effort by approximately 40% for the operations team.
- Integrated the reporting system with a **PostgreSQL** database to extract relevant audit trail and transaction data, ensuring data accuracy and traceability.
- Deployed the application using **Docker** containers on **AWS EC2** instances, establishing a reliable and scalable solution for ongoing reporting needs.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
