PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Documented and implemented intricate business processes for enterprise clients using the **Confidence platform**, translating complex operational knowledge into structured, quality-controlled workflows.
- Provided live **product demonstrations** of the Confidence platform to client stakeholders, effectively showcasing features and driving user adoption.
- Collaborated with client engineering teams to integrate the Confidence platform into their existing systems, ensuring seamless data flow and operational alignment.
- Analyzed client process data and built compelling **business cases** demonstrating the platform's value, leading to a **~20% improvement** in identified efficiency gains for a pilot customer.
- Identified and documented critical exception use cases within client workflows, recommending specific platform features to enhance error handling and process resilience.
- Trained client operations teams on effective platform usage, resulting in a **15% reduction** in support queries related to platform navigation and basic functionalities.

SKILLS

Process Engineering – Business Process Documentation, Workflow Optimization, Process Improvement, Client Onboarding, Stakeholder Training, Business Case Development, Requirements Gathering

Platform Expertise – Confidence Platform, Product Demonstration, Feature Recommendation, Exception Use Case Identification

Technical Skills – SQL, Python, Excel, REST APIs, Java Spring Boot, AWS, Docker, Linux, Git, Jenkins

Data Analysis & BI – Data Analysis, Data Interpretation, Business Intelligence, Power BI, Tableau, DAX, Power Query

Project Management – Agile/Scrum Methodologies, Jira, Confluence, Change Management, Incident Response, SLA Management

PROJECTS

Enterprise Client Process Automation (HCL Technologies)

- Designed and documented end-to-end business processes for a financial services client, mapping transaction reconciliation workflows using **Java Spring Boot** and **Python** scripting for data validation.
- Developed automated reporting scripts in **Python** that summarized daily reconciliation exceptions, reducing manual report generation time by approximately **4 hours per week**.
- Collaborated with client business analysts and operations teams to gather requirements and support User Acceptance Testing (UAT) for new process automation features.

Operational Dashboard Enhancement (HCL Technologies)

- Enhanced a payments operations dashboard by developing new **SQL** queries on **PostgreSQL** to track key performance indicators for payment processing, improving visibility for 12 operations staff.
- Created interactive visualizations in **Power BI** to present real-time operational alerts and historical trend data, enabling faster identification of systemic issues.
- Implemented change requests and bug fixes within the existing Java Spring Boot application, ensuring continued stability of the operational monitoring tools.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
